## SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

<sup>r</sup> revised figures.

<sup>P</sup> preliminary figures.

<sup>a</sup> advance figures.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont utilisés dans les tableaux:

<sup>r</sup> chiffres rectifiés.

<sup>P</sup> chiffres provisoires.

<sup>a</sup> chiffres préliminaires.

ESTIMATES OF LABOUR INCOME

ESTIMATIONS DU REVENU DU TRAVAIL

January - 1975 - Janvier

Labour income, adjusted for seasonal variations, was estimated at \$6,619 million in January 1975, a decrease of \$176.1 million or 2.6% from December, 1974. Wages and salaries in the goods-producing industries declined by 0.4% and those in the service-producing industries, partly because of the inclusion of large cost of living payments in the December estimate, declined by 3.8%.

Unadjusted for seasonal variations, the January estimate of \$6,519.8 million for labour income represented a gain of 15.4% from that recorded during January 1974.

Le revenu du travail a été estimé après désaisonnalisation à \$6,619 millions en janvier 1975, ce qui représente une baisse de \$176.1 millions, ou de 2.6 %, par rapport à décembre 1974. Les salaires et traitements ont diminué de 0.4 % dans les industries de biens; dans les industries de services, ils ont accusé une baisse de 3.8 %, en partie à cause de la prise en compte d'importantes indemnités de vie chère dans l'estimation de décembre.

Avant désaisonnalisation, l'estimation de \$6,519.8 millions du revenu du travail en janvier représente une avance de 15.4 % sur le niveau atteint en janvier 1974.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.  
Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1973 data and to project from November 1973 to obtain 1974 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1973 et à projeter les données de 1974 à partir des estimations de novembre 1973 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1973 Total wages and salaries equal 100% — Poids — Rémunérations totales 1973 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendence de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.		
3. Hunting and trapping — Chasse et piégeage.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
4. Forestry — Forêts.		1.2
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	25.5
7. Construction.		7.8
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		10.8
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.5
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.7
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.4
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	0.1

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1970 are final and those for 1971 to 1973 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1970 estimates are final and those for the period January 1971 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1970 étant définitives et celles pour 1971 à 1973 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1970 étant définitives et celles portant sur la période commençant en janvier 1971 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 - Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 - Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 - Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

72-202 - Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

72-204 - Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

72-502 - Labour Income, 1926-1958 - épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-508 - Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 - Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

72-511 - Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

72-601 - Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

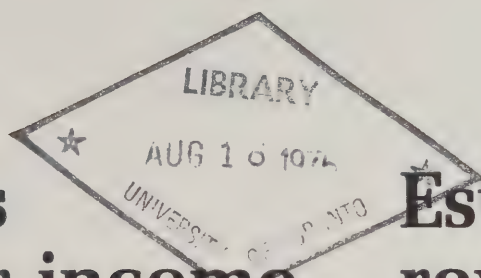

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

## INTRODCUTION

Labour income, adjusted for seasonal variations, was estimated at \$6,937.3 million in April, an increase of \$25.6 million or 0.4% from March. Wages and salaries in both the goods-producing and service-producing industries advanced at approximately the same rate.

Unadjusted for seasonal variations, the April estimate of labour income showed an increase of 14.6% over April 1974.

The February, March, and April issues of "Estimates of Labour Income" have been combined into a single issue entitled "Estimates of Labour Income" February - April 1975. This was done in order to present the most current available data and to restore publication on a regular basis.

Après désaisonnalisation, on estime à \$6,937.3 millions le revenu du travail en Avril, une hausse de \$25.6 millions ou de 0.4 % par rapport à Mars. Les salaires et traitements ont augmenté tant dans les industries productrices de biens que de services à peu près au même rythme.

L'estimation du revenu du travail non désaisonnalisé, en Avril, indique une augmentation de 14.6 % par rapport à Avril 1974.

Les numéros de février, mars et avril de la publication "Estimations du revenu du travail" ont été regroupés en une seule livraison intitulée "Estimations du revenu du travail" février - avril 1975. Ceci a été fait dans le but de présenter toutes les données disponibles et de rétablir la publication sur une base régulière.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %</p>
1. Agriculture.	<p>Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.</p>	0.8
2. Fishing — Pêche.	<p>Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.</p>	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.	<p>Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.</p>	1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.		24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	<p>Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.</p>	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.		3.6
16. Provincial administration — Administrations provinciales.	<p>Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.</p>	2.5
17. Local administration — Administrations locales.		2.0
18. Other government offices — Autres services gouvernementaux.	<p>Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.</p>	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail, Bil.

72-005 Estimations du revenu du travail, Bil.

#### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées, Bil.

#### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière, Bil.

72-508 Estimations du nombre d'employés par province et industrie, Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière, Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie, Bil.

#### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970, Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972, Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973, Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1975, Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970, Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971, Bil.

72-613 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972, Bil.

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

#### Monthly

72-002 Employment, Earnings and Hours, Bil.

72-005 Estimates of Labour Income, Bil.

#### Annual

72-206 Employment, Earnings and Hours Seasonally-adjusted Series, Bil.

#### Occasional

72-506 Labour Costs in Manufacturing, Bil.

72-508 Estimates of Employees by Province and Industry, Bil.

72-510 Labour Costs in Manufacturing, Bil.

72-511 Labour Costs in Canada: Mines, Quarries and Oil Wells, Bil.

72-513 Estimates of Employees by Province and Industry, Bil.

#### Annual/Various

72-601 Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970, Bil.

72-602 Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972, Bil.

72-603 Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973, Bil.

72-610 Labour Costs in Canada: Finance, Insurance and Real Estate, 1975, Bil.

72-611 Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970, Bil.

72-612 Labour Costs in Canada: Manufacturing, 1971, Bil.

72-613 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972, Bil.

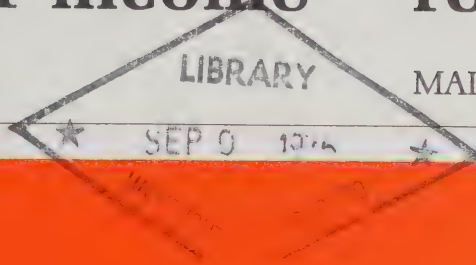

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada). K1A OT6

## ESTIMATES OF LABOUR INCOME

May - 1975 - Mai

Labour income, unadjusted for seasonal variations, was estimated at \$7,155.1 million in May, an increase of 14.6% over the same month in 1974. Year-to-date, the estimates for 1975 represent an increase of 15.1% over the same period in 1974.

Adjusted for seasonal variations, labour income advanced by 1.3% in May, as compared to a 0.9% increase in April. Wages and salaries in the goods-producing industries advanced by 1.0%, due mainly to a 1.1% increase in manufacturing. In mining, wages and salaries rose by 4.1%, attributable in part to the inclusion of retro-active payments. Construction recorded virtually no change while in forestry, wages and salaries declined.

In the service-producing industries, wages and salaries advanced by 1.5%. Most of this increase was concentrated in the service industries (education, hospital, welfare organizations, commercial services) and in public administration and defence, and was due primarily to increases in average earnings.

## ESTIMATIONS DU REVENU DU TRAVAIL

Le revenu du travail a été estimé avant désaisonnalisation à \$7,155.1 millions en mai, soit une augmentation de 14.6 % par rapport à la même période de 1974. Les estimations cumulatives pour 1975 font ressortir une augmentation de 15.1 % par rapport à la même période de 1974.

Après désaisonnalisation, le revenu du travail a subi une hausse de 1.3 % en mai, contre 0.9 % en avril. La hausse de 1.0 % des salaires et traitements dans les industries productrices de biens est surtout attribuable à la hausse de 1.1 % dans les industries manufacturières. La hausse de 4.1 % des salaires et traitements dans les industries minières est en partie attribuable à la prise en compte des rappels de paiements. L'industrie de la construction n'a enregistré pratiquement aucun changement, tandis qu'on a observé une baisse des salaires et traitements dans l'industrie forestière.

Les salaires et traitements dans les industries de services ont avancé de 1.5 %. La plus grande partie de cette augmentation est surtout attribuable aux hausses des gains moyens dans les industries de services (enseignement, hôpitaux, organismes de bien-être, services commerciaux) et dans l'administration publique et la défense.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.  
 Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

TABLE 4. Wages and Salaries by Province, Adjusted for Seasonal Variation

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %</p>
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piègeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1)) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie d'après le concept de l'établissement:

## INTRODUCTION

Labour income, unadjusted for seasonal variations, was estimated at \$7,384.1 million in June, an increase of 15.0% over the same month of 1974. Year-to-date, the 1975 estimates of labour income represent an increase of 15.3% over the comparable period of 1974.

During the second quarter of 1975, labour income, adjusted for seasonal variations, advanced by 2.8%, as compared to an increase of 1.7% during the first quarter of 1975.

The first quarter change was somewhat deflated owing to the inclusion of large cost of living payments made to Quebec government employees in the fourth quarter. Removing the effect of those payments along with other known irregularities from the quarterly estimates, the first quarter increase would have been 2.7%, as compared to a 2.9% gain in the second quarter. As in the previous quarter, most of the second quarter gain was attributable to the average earnings component as employment showed little change.

In the goods-producing industries, wages and salaries advanced by 1.8%, over twice the gain recorder during the first quarter. Most of this acceleration in growth was attributable to manufacturing, which after recording virtually no change during the first quarter, advanced by 2.5% during the second quarter. Construction, affected somewhat by industrial disputes declined slightly while the primary industries recorded a 3.0% gain.

Wages and salaries in the service-producing industries, increased by 3.4% as compared to a gain of 2.4% during the first quarter. The inclusion of the cost of living payments to Quebec government employees in the fourth quarter, depressed the relative change from the fourth to the first quarter. Increases were recorded in all industry divisions with gains ranging from 0.9% in transportation, communication, and other utilities to 7.6% in federal administration; the latter being somewhat affected by the inclusion of large retroactive payments in the second quarter estimate.

Sans désaisonnalisation, on estime à \$7,384.1 millions le revenu du travail en juin, soit une augmentation de 15.0 % par rapport au même mois en 1974. L'estimation, depuis le début de 1975, du revenu du travail indique une augmentation de 15.3 % par rapport à la période comparable de 1974.

Au cours du deuxième trimestre de 1975, le revenu du travail, après désaisonnalisation, a progressé de 2.8 %, alors qu'il avait progressé de 1.7 % au cours du premier trimestre de 1975.

L'augmentation du premier trimestre a été quelque peu amoindrie par l'intégration d'importantes indemnités de vie chère versées aux fonctionnaires du gouvernement québécois au cours du quatrième trimestre. Lorsqu'on défalque les répercussions de ces paiements, ainsi que d'autres facteurs irréguliers, des estimations trimestrielles, la hausse du premier trimestre s'établit à 2.7 % ce qui se compare à l'augmentation de 2.9 % au cours du deuxième trimestre. Comme c'était le cas au premier trimestre, la part la plus considérable de la hausse du deuxième trimestre a été attribuable à la composante des gains moyens alors que l'emploi a très peu varié.

Dans les industries productrices de biens, la rémunération a connu une hausse de 1.8 %, soit plus du double de l'augmentation enregistrée pendant le premier trimestre. Cette accélération de la hausse était dans une large mesure attribuable aux industries manufacturières, qui, après n'avoir pratiquement pas varié au cours du premier trimestre, ont enregistré une progression de 2.5 % pendant le deuxième trimestre. L'industrie de la construction, légèrement touchée par des conflits de travail a enregistré une légère diminution, cependant que les industries primaires ont connu une hausse de 3.0 %.

La rémunération dans les industries de services, a augmenté de 3.4 % comparativement à une hausse de 2.4 % au premier trimestre. La prise en compte des indemnités de vie chère versées aux fonctionnaires du gouvernement québécois au quatrième trimestre a amoindri le changement relatif intervenant entre le quatrième trimestre et le premier. On a noté des augmentations dans toutes les branches de l'activité économique, les hausses s'échelonnant de 0.9 % dans le transport, les communications et autres services publics à 7.6 % dans l'administration fédérale; cette dernière a été un tant soit peu affectée par la prise en compte de paiements rétroactifs considérables dans les estimations du deuxième trimestre.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %</p>
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms<sup>(1)</sup>) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

## Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

## Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie d'après le concept de l'établissement:

### Catalogue

### Mensuel

72-002 Emploi, gains et durée du travail, Bil.

72-005 Estimations du revenu du travail, Bil.

### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées, Bil.

### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière, Bil.

72-508 Estimations du nombre d'employés par province et industrie, Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière, Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie, Bil.

### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970, Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972, Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973, Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1975, Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970, Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971, Bil.

72-613 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972, Bil.

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, KIA OT6.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

72-002 Employment, Earnings and Hours, Bil.

72-005 Estimates of Labour Income, Bil.

### Annual

72-206 Employment, Earnings and Hours Seasonally-adjusted Series, Bil.

### Occasional

72-506 Labour Costs in Manufacturing, Bil.

72-508 Estimates of Employees by Province and Industry, Bil.

72-510 Labour Costs in Manufacturing, Bil.

72-511 Labour Costs in Canada: Mines, Quarries and Oil Wells, Bil.

72-513 Estimates of Employees by Province and Industry, Bil.

### Annual/Various

72-601 Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970, Bil.

72-602 Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.

72-603 Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973, Bil.

72-610 Labour Costs in Canada: Finance, Insurance and Real Estate, 1975, Bil.

72-611 Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970, Bil.

72-612 Labour Costs in Canada: Manufacturing, 1971, Bil.

72-613 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972, Bil.

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada). K1A 0T6

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

July - 1975 - Juillet

Labour income, unadjusted for seasonal variations, was estimated at \$7,334.9 million in July, an increase of 14.8% over the same month of 1974. Year-to-date the 1975 estimates of labour income represent an increase of 15.3% over the comparable period of 1974.

Adjusted for seasonal variations, the July estimate of labour income showed an increase of 2.2% over June. Most of this advance was attributable to the payment of lump sum cost-of-living allowances in the public sector in the province of Quebec. Removing the effect of these payments from the estimates, the July estimate would have recorded a slight decline.

Wages and salaries in the goods-producing industries declined by 1.0% due largely to the industrial disputes in forestry and related industries. In the service-producing industries, wages and salaries advanced by 4.2%. Approximately ninety percent of this gain was due to the inclusion of the cost-of-living payments mentioned above.

Le revenu du travail a été estimé avant désaisonnalisation à \$7,334.9 millions en juillet, soit une augmentation de 14.8 % par rapport à la même période de 1974. Les estimations cumulatives pour 1975 font ressortir une augmentation de 15.3 % par rapport à la même période de 1974.

Après désaisonnalisation, le revenu du travail a connu une hausse de 2.2 % en juillet par rapport à juin. La plus grande partie de cette avance est attribuable aux indemnités de vie-chère versées sous forme de paiements forfaitaires dans le secteur public au Québec. Si l'on enlevait ces sommes des estimations, on observerait un léger fléchissement de l'estimation de juillet.

Les salaires et traitements dans les industries de biens ont régressé de 1.0 % principalement par suite de conflits du travail dans les industries forestières et annexes. Dans les industries de services, ils ont avancé de 4.2 %. Environ 90 % de cette augmentation s'expliquent par l'inclusion des indemnités de vie-chère mentionnées précédemment.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

TABLE 4. Wages and Salaries by Province, Adjusted for Seasonal Variation

TABLEAU 4. Salaires et traitements par province, chiffres désaisonnalisés

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %</p>
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.		
3. Hunting and trapping — Chasse et piégeage.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

## Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

## Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail, Bil.

72-005 Estimations du revenu du travail, Bil.

#### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées, Bil.

#### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière, Bil.

72-508 Estimations du nombre d'employés par province et industrie, Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière, Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie, Bil.

#### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970, Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972, Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973, Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1975, Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970, Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971, Bil.

72-613 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972, Bil.

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

August - 1975 - Août

Labour income, unadjusted for seasonal variations, was estimated at \$7,269.4 millions in August, an increase of 11.8% over the same month of 1974.

Adjusted for seasonal variations, the August estimate of labour income showed a decline of 1.4% over July. Most of this decrease was attributable to the payment of lump sum cost-of-living allowances in the public sector in the province of Quebec. Removing the effect of these payments from the estimates, the August estimate would have recorded a slight increase.

Wages and salaries in the goods-producing industries increased by 0.9%. The estimate for August was still affected by industrial disputes in forestry and related industries. In the service-producing industries, wages and salaries declined by 2.8% due to the inclusion in the July estimate of the above mentioned cost-of-living payments.

Le revenu du travail a été estimé, avant désaisonnalisation, à \$7,269.4 millions en août, une augmentation de 11.8 % par rapport à la même période de 1974.

Après désaisonnalisation, le revenu du travail a connu une baisse de 1.4 % par rapport à juillet. La plus grande partie de cette baisse est attribuable aux indemnités de vie-chère versées sous forme de paiements forfaitaires dans le secteur public au Québec. Si l'on enlevait ces sommes des estimations, on observerait une légère augmentation de l'estimation d'août.

Les salaires et les traitements dans les industries de biens ont progressé de 0.9 %, en dépit des conflits du travail qui sévissent encore dans les industries forestières et activités annexes. Dans les industries de services, ils ont reculé de 2.8 % en raison de l'inclusion, dans l'estimation de juillet, des indemnités de vie-chère mentionnées précédemment.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pension du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	2.4
6. Manufacturing — Industries manufacturières.		24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

## Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

## Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

## ESTIMATES OF LABOUR INCOME

Septembre - 1975 - Septembre

Labour Income, unadjusted for seasonal variations, was estimated at \$7,641.6 million in September, an increase of 12.6% over the same month of 1974. On a year to date basis, the 1975 estimates of labour income represent an increase of 14.7% over the comparable period of 1974.

During the third quarter of 1975 labour income, adjusted for seasonal variations, advanced by 4.3% as compared to gains of 1.7% and 2.9% recorded during the first and second quarters, respectively.

The increase in the third quarter was mainly due to the inclusion of COLA payments to Quebec government employees. Industrial disputes, especially in the goods-producing industries, also significantly affected the third quarter estimates. Removing these effects from the quarterly estimates, the gain in the rate of growth recorded during the third quarter would have been approximately one percentage point greater than the gains recorded in each of the two preceding quarters. The acceleration underlying the third quarter estimates was mainly concentrated in the construction and service-producing industries. Most, if not all of the gain in wages and salaries in the third quarter was attributable to the earnings component, as virtually no change was observed in employment.

Wages and salaries in the goods-producing industries advanced by 0.9% as compared to a gain of 1.8% in the second quarter of 1975. The marked deceleration was attributable to industrial disputes in the forestry, mining and manufacturing sectors, of which the first two recorded declines in wages and salaries while the latter showed only a slight increase. In contrast, wages and salaries in construction increased by 3.9% which was mainly due to gains in Quebec and British Columbia.

In the service-producing industries, wages and salaries advanced by 6.4% as compared to the second quarter gain of 3.6%. A large part of this augmentation was due to the inclusion of COLA payments to Quebec government employees. Removing these payments with other known irregularities, the third quarter gain was 4.2% compared to 3.5% during the second quarter. Increases in wages and salaries were recorded in all industry divisions ranging from 3.3% in transportation, communication and other utilities, to 9.2% in service, the latter being affected by the inclusion of these lump-sum payments.

## ESTIMATIONS DU REVENU DU TRAVAIL

Avant désaisonnalisation, on estime à \$7,641.6 millions le revenu du travail en septembre, soit une augmentation de 12.6 % par rapport au même mois en 1974. Depuis le début de 1975, les estimations du revenu du travail révèlent une augmentation de 14.7 % par rapport à la période correspondante de 1974.

Au cours du troisième trimestre de 1975, le revenu du travail, après désaisonnalisation, a progressé de 4.3 % comparativement à 1.7 % et 2.9 % au cours des premier et deuxième trimestre respectivement.

L'augmentation enregistrée au troisième trimestre est en grande partie attribuable à la prise en compte des indemnités de vie chère versées aux fonctionnaires du gouvernement du Québec. Des conflits de travail, en particulier dans les industries de biens, ont également compté pour beaucoup dans les estimations du troisième trimestre. Si l'on défalque les répercussions de ces paiements des estimations trimestrielles, la hausse du taux de croissance enregistrée au troisième trimestre s'établit à environ un point de pourcentage de plus que les augmentations des deux trimestres précédents. L'accélération de la hausse pendant ce trimestre est en grande partie attribuable aux augmentations déclarées dans la construction et dans les industries de services. La hausse de la rémunération au troisième trimestre est dans une large mesure, sinon entièrement, imputable à la composante des gains, puisque presque aucune variation n'a été observée dans l'emploi.

La rémunération dans les industries de biens a progressé de 0.9 % comparativement à 1.8 % au deuxième trimestre de 1975. Ce ralentissement marqué est attribuable à des conflits de travail dans les secteurs des forêts, des mines et des industries manufacturières. La rémunération a diminué dans les forêts et les mines, tandis qu'elle a légèrement augmenté dans les industries manufacturières. Par ailleurs, elle a progressé de 3.9 % dans la construction suite surtout à des augmentations au Québec et en Colombie-Britannique.

Dans les industries de services, la rémunération a connu une hausse de 6.4 % comparativement à une augmentation de 3.6 % au deuxième trimestre. Cette hausse est en grande partie attribuable à la prise en compte des indemnités de vie chère versées aux fonctionnaires du gouvernement du Québec. Après défalcation de ces paiements ainsi que d'autres facteurs irréguliers, l'augmentation enregistrée au troisième trimestre s'élève à 4.2 % comparativement à 3.5 % au deuxième trimestre. On a noté des progressions de la rémunération dans toutes les branches d'activité économique, s'échelonnant de 3.3 % dans les transports, communications et autres services publics à 9.2 % dans les services; la progression dans ce secteur a été touchée par la prise en compte des paiements forfaitaires.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %</p>
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.		24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms<sup>(1)</sup>) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

- 72-002 Emploi, gains et durée du travail. Bil.
- 72-005 Estimations du revenu du travail. Bil.

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

OCTOBER — 1975 — OCTOBRE

Labour Income, adjusted for seasonal variations, was estimated at \$7,458.0 million in October, a decrease of \$32.5 million or 0.4% from September. The September estimate, however, was significantly affected by the inclusion of lump sum cost-of-living payments such that if these were removed, the October estimate would show an increase of 1.7%. Also back to work legislation passed by the B.C. government in mid October contributed significantly to the 1.7% increase.

Unadjusted for seasonal variations, the October estimate of labour income was 12.6% greater than that recorded for October 1974. On a year to date basis, the 1975 estimate represented an increase of 14.5% over the comparable period of 1974.

Après désaisonnalisation, le revenu du travail a été estimé à \$7,458.0 millions en octobre, un fléchissement de \$32.5 millions (0.4 %) depuis septembre. Toutefois, l'inclusion d'indemnités de vie-chère versées sous forme de paiements forfaitaires a influé sensiblement sur l'estimation de septembre si bien que si elles en avaient été retranchées, l'estimation d'octobre aurait marqué une hausse de 1.7 %. En outre, les mesures législatives prises à la mi-octobre par le gouvernement de la C.-B. pour ordonner le retour au travail auraient grandement contribué à cette augmentation.

Avant désaisonnalisation, l'estimation d'octobre du revenu du travail était de 12.6 % supérieure à celle d'octobre 1974. Depuis le début de l'année, l'estimation représente une hausse de 14.5 % au regard de la même période en 1974.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

TABLE 4. Wages and Salaries by Province, Adjusted for Seasonal Variation

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendence de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	2.4
6. Manufacturing — Industries manufacturières.		24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.		9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

NOVEMBER — 1975 — NOVEMBRE

Labour income, unadjusted for seasonal variation, was estimated at \$7,509.4 million in November, an increase of 12.0% over the same month of 1974. On a year-to-date basis, the 1975 estimate of labour income represents an increase of 14.5% over the comparable period of 1974.

Adjusted for seasonal variation, the November estimate of labour income showed an increase of \$12.0 million or 0.2% from October. Wages and salaries in the goods-producing industries advanced by 1.4%. The cessation of the strike in the British Columbia forestry and related industries due to back-to-work legislation passed in mid-October, contributed to the increase.

However, continued industrial disputes in these same industries in Quebec, Ontario and the Atlantic provinces, minimized the increase. In the service-producing industries, wages and salaries declined by 0.5 % mainly due to the Postal Workers' strike which prevailed throughout the month.

En novembre, le revenu du travail non désaisonnalisé a été estimé à \$7,509.4 millions, soit une augmentation de 12.0 % par rapport au même mois de 1974. Sur une base annuelle, le revenu estimatif du travail a enregistré une hausse de 14.5 % en 1975 par rapport à la période correspondante de 1974.

Les chiffres désaisonnalisés indiquent que le revenu estimatif du travail pour novembre a augmenté de \$12.0 millions (0.2 %) par rapport au mois d'octobre. Dans les industries de biens, les salaires et les traitements ont enregistré une hausse de 1.4 %. Cette augmentation est attribuable en partie à la fin de la grève dans l'industrie forestière de la Colombie-Britannique et dans les industries connexes à la suite de la mesure législative concernant le retour au travail votée à la mi-octobre.

Toutefois, des conflits de travail prolongés dans ce secteur de l'activité économique au Québec, en Ontario et dans les provinces de l'Atlantique ont minimisé cette augmentation. Dans les industries de services, les salaires et les traitements ont diminué de 0.5 %, en grande partie à cause de la grève des postiers qui a duré tout le mois.

D. ....											

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations impossibles. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendances de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondés sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondés sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondés sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms<sup>(1)</sup>) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

(1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

(1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

72-005 Estimations du revenu du travail. Bil.

#### Annuel

## ESTIMATES OF LABOUR INCOME

---

## ESTIMATIONS DU REVENU DU TRAVAIL

DECEMBER - 1975 - DÉCEMBRE

Publication "Estimates of Labour Income", Catalogue No. 72-005 will no longer be published on a monthly basis. Instead, a quarterly publication, under the same title, will be initiated containing all of the series presently available in the monthly publication, as well as more detail by industry at the provincial level. Advance monthly information for selective series will still be published in the "Statistics Canada Daily", Catalogue No. 11-001, and additional information will be made available on request to:

Labour Income Unit  
Labour Division  
Statistics Canada  
Ottawa K1A 0V2

---

Le bulletin *Estimations du revenu du travail* (n° 72-005 au catalogue) ne paraîtra plus tous les mois. On le remplacera par une livraison trimestrielle qui portera le même titre et présentera les mêmes séries ainsi que de plus amples renseignements par branche d'activité au niveau provincial. Des données préliminaires sur certaines séries seront publiées dans *Le quotidien de Statistique Canada* (n° 11-001 au catalogue). On pourra obtenir des renseignements supplémentaires en s'adressant à:

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

DECEMBER - 1975 - DÉCEMBRE

Labour Income, adjusted for seasonal variation was estimated at \$7,580.4 million in December, an increase of 1.1% from the estimate for the preceding month. The December estimate reflects the cessation of the Postal Worker's strike. Wages and salaries in the goods-producing industries advanced by 1.3% and those in the service-producing industries by 1.0%.

During the fourth quarter, labour income, adjusted for seasonal variation, advanced by 1.6% as compared to gains of 1.7%, 2.9% and 4.5% recorded during the first, second and third quarters, respectively. Wages and salaries in the goods-producing industries advanced by 4.1% while those in the service-producing industries showed an increase of 0.1%. The third quarter estimates reflect the inclusion of lump-sum payments made to Quebec government employees.

Preliminary estimates indicate that labour income increased by 14.0% during 1975, as compared to a gain of 16.9% experienced during 1974, and 13.4% during 1973. In the goods-producing industries, wages and salaries advanced by 10.0%; those in the service-producing industries by 16.3%.

En décembre, le revenu du travail désaisonnalisé a été estimé à \$7,580.4 millions, soit une augmentation de 1.1 % par rapport aux estimations du mois précédent, estimation qui reflète la fin de la grève des postes ce mois-là. Les salaires et les traitements ont progressé de 1.3 % dans les industries de biens et de 1.0 % dans les industries de services.

Au cours du quatrième trimestre, le revenu du travail désaisonnalisé s'est accru de 1.6 %, comparativement à des augmentations de 1.7 %, 2.9 % et 4.5 % respectivement au cours des trois premiers trimestres. Dans les industries de biens, les salaires et les traitements ont progressé de 4.1 % tandis que dans les industries de services, cette augmentation se limitait à 0.1 %. Les estimations du troisième trimestre tiennent compte des montants forfaitaires que le gouvernement provincial du Québec a versé à ses employés.

Des estimations préliminaires révèlent que le revenu du travail a augmenté de 14.0 % au cours de 1975, contre des gains de 16.9 % en 1974 et de 13.4 % en 1973. Les salaires et traitements ont progressé de 10.0 % dans les industries de biens et de 16.3 % dans les industries de services.

(1) Includes Yukon, Northwest Territories and Canadian residents abroad. — Y compris le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger. (2) The difference between the sum of the provinces and these totals, which include Yukon, Northwest Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry. — La différence entre la somme des chiffres pour les provinces et ces totaux, qui comprennent le Yukon, les Territoires du Nord-Ouest et les résidents du Canada à l'étranger, renferme une erreur résiduelle provenant de la désaisonnalisation par province et par branche d'activité économique.

Note: Estimates may not add to totals, owing to rounding. — Nota: Les chiffres ayant été arrondis, la somme des estimations ne correspond pas nécessairement aux totaux indiqués.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1974 data and to project from November 1974 to obtain 1975 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industries (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1974 et à projeter les données de 1975 à partir des estimations de novembre 1974 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1974 Total wages and salaries equal 100% — Poids — Rémunérations totales 1974 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.		
3. Hunting and trapping — Chasse et piégeage.	Value of fish caught and landed as published in Fisheries Statistics Cat. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.4
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	24.7
7. Construction.		8.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.1
9. Trade — Commerce.		14.1
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.8
11. Commercial services — Services commerciaux.		8.0
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.1
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.4
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. 72-004. — Salaires et traitements fondés sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.6
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. 72-007. — Salaires et traitements fondés sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.5
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. 72-009. — Salaires et traitements fondés sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.0
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	..

.. Amount too small to be expressed. — Nombres infimes.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) annual estimates for the industries, the provinces and for Manufacturing by province of which the estimates for 1961 to 1971 are final and those for 1972 to 1974 are preliminary;
- (b) monthly estimates for the industries, the provinces, and for Manufacturing by province of which the 1971 estimates are final and those for the period January 1972 to date are preliminary;
- (c) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) estimations annuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1961 à 1971 étant définitives et celles pour 1972 à 1974 provisoires;
- b) estimations mensuelles pour les branches d'activité, les provinces et les industries manufacturières par province, les estimations de 1971 étant définitives et celles portant sur la période commençant en janvier 1972 provisoires;
- c) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. 72-004, Provincial Government Employment, Cat. 72-007 and Local Government Employment, Cat. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

72-005 Estimations du revenu du travail. Bil.

#### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées. Bil.

#### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-508 Estimations du nombre d'employés par province et industrie. Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie. Bil.

72-514 Estimations du nombre d'employés par province et par industrie. Bil.

#### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970. Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972. Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973. Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970. Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970. Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971. Bil.

72-613 Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972. Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

72-002    Employment, Earnings and Hours. Bil.

72-005    Estimates of Labour Income. Bil.

### Annual

72-206    Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

### Occasional

72-506    Labour Costs in Manufacturing. Bil.

72-508    Estimates of Employees by Province and Industry. Bil.

72-510    Labour Costs in Manufacturing. Bil.

72-511    Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.

72-513    Estimates of Employees by Province and Industry. Bil.

72-514    Estimates of Employees by Province and Industry. Bil.

### Annual/Various

72-601    Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.

72-602    Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.

72-603    Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.

72-610    Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.

72-611    Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.

72-612    Labour Costs in Canada: Manufacturing, 1971. Bil.

72-613    Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

January-March - 1976 - Janvier-mars

During the first quarter, labour income, adjusted for seasonal variation, advanced by 4.5% as compared to a gain of 2.0% recorded during the fourth quarter of 1975. Wages and salaries in the goods-producing industries advanced by 5.0% while those in the service-producing industries showed an increase of 3.8%.

Two thirds of the acceleration in the rate of growth in labour income was attributable to certain irregular factors, namely, the cessation of major industrial disputes in the pulp and paper and related industries and in the Post Office, which severely affected the fourth quarter estimates; the inclusion of large indexation payments in the third quarter made to Quebec public sector employees, which dampened the fourth quarter advance; and the increased employer contributions, which came into effect in the beginning of 1976, to publicly controlled welfare plans.

On a monthly basis, labour income adjusted for seasonal variation, increased by 1.1% in January. Approximately 40% of this advance was attributable to increased employer premiums to public pension and welfare plans. In February, labour income increased by 1.7% with all industry divisions participating in the advance except for transportation, communication and other utilities which experienced a slight decline. A 0.7% increase was recorded in March, reflecting, in part, retroactive payments to Post Office employees.

Unadjusted for seasonal variation, the first quarter of 1976 showed an increase of 15.4% as compared to the first quarter of 1975.

### NOTE

Estimates of labour income have been revised for the period 1971 through 1975 to incorporate revised annual and monthly data and revised seasonal factors. These revisions are contained in this publication.

Au cours du premier trimestre, le revenu du travail désaisonnalisé s'est accru de 4.5 % comparativement à une augmentation de 2.0 % au cours du quatrième trimestre de 1975. Dans les industries de biens, les salaires et les traitements ont progressé de 5.0 % tandis que les industries de services, l'augmentation se chiffrait à 3.8 %.

Deux tiers de l'accélération dans le taux de croissance du revenu du travail étaient attribuables à certains facteurs irréguliers, notamment à la fin des grands conflits du travail dans les industries des pâtes et papiers et les activités annexes et dans les services postaux, qui avaient sérieusement affecté les estimations du quatrième trimestre à l'inclusion, au cours du troisième trimestre, de versements d'indexation considérables aux employés du secteur public du Québec qui avait ralenti la croissance au quatrième trimestre, ainsi qu'à l'augmentation des contributions des employeurs aux régimes de bien-être publics, qui sont entrées en vigueur au début de 1976.

Sur une base mensuelle, le revenu du travail désaisonnalisé a augmenté 1.1 % en janvier. Environ 40 % de cette hausse est attribuable à l'augmentation des primes de l'employeur aux régimes de pension et de bien-être publics. En février, le revenu du travail a augmenté de 1.7 %, toutes les divisions d'activité contribuant à la hausse sauf les transports, les communications et les autres services publics qui ont subi une légère baisse. Une augmentation de 0.7 % a été enregistrée en mars, reflétant, en partie, les rappels de salaire accordés aux employés des bureaux de poste.

Avant désaisonnalisation, le premier trimestre de 1976 a connu une augmentation de 15.4 % par rapport au premier trimestre de 1975.

### NOTA

Les estimations du revenu du travail ont été révisées pour la période de 1971 à 1975 de façon à tenir compte des données annuelles et mensuelles rectifiées ainsi que des coefficients saisonniers rectifiés. Ces révisions sont contenues dans la présente publication.

(3) THE DIFFERENCE BETWEEN THE SUM OF THE PROVINCES AND CANADA TOTALS, WHICH INCLUDE YUKON, NORTHWEST TERRITORIES AND CANADIAN RESIDENTS ABROAD, CONTAINS A RESIDUAL ERROR RESULTING FROM SEASONALLY ADJUSTING BY PROVINCE AND BY INDUSTRY. - LA DIFFERENCE ENTRE LA SOMME DES CHIFFRES POUR LES PROVINCES ET LES TOTAUX DU CANADA, QUI COMPRENNENT LE YUKON, LES TERRITOIRES DU NORD-OUEST ET LES RESIDENTS DU CANADA A L'ETRANGER, RENFERME UNE ERREUR RESIDUELLE PROVENANT DE LA DESAISONNALISATION PAR PROVINCE ET PAR BRANCHE D'ACTIVITE ECONOMIQUE.

Labour income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms.(1)
- (b) Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.(2)

Separate monthly estimates of wages and salaries are prepared for each province for 18 industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate benchmark data to months and to project from November 1975 to obtain 1976 data, are shown below for the 18 groups for which separate provincial estimates are prepared:

See footnotes on page 40.

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations impossables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définis plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour 18 branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de référence aux mois et à projeter les données de 1976 à partir des estimations de novembre 1975 figurent ci-dessous pour les 18 branches pour lesquelles il est établi des estimations au niveau provincial:

Voir notes à la page 40.

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights - 1975 Total wages and salaries = 100% — Poids - Rémunérations totales 1975 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals - Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing - Pêche.	Value of fish caught and landed as published in <u>Fisheries Statistics</u> , Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of <u>Fur Production</u> , Catalogue 23-207 - Valeur des poissons pris et débarqués, selon <u>La statistique mensuelle des pêches du Canada</u> , n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication <u>Production de fourrures</u> , n° 23-207 au catalogue.	0.1
3. Hunting and trapping - Chasse et piégeage.		0.1
4. Forestry - Forêts.		1.0
5. Mining - Mines.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of <u>Employment, Earnings and Hours</u> , Catalogue 72-002 - Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication <u>Emploi, gains et heures de travail</u> , n° 72-002 au catalogue.	2.5
6. Manufacturing - Industries manufacturières.		22.9
7. Construction.		9.3
8. Transportation, communication and other utilities - Transports, communications et autres services publics.		10.3
9. Trade - Commerce.		13.8
10. Finance, insurance and real estate - Finances, assurances et affaires immobilières.		6.1
11. Commercial services - Services commerciaux.	Number of employees as tabulated for the preparation of <u>Estimates of Employees by Province and Industry</u> , Catalogue 72-514, combined with average earnings in the large firms(1) for education - Nombre de salariés calculé pour la publication <u>Estimations du nombre de salariés par province et par industrie</u> , n° 72-514 au catalogue, et gains moyens dans les grandes entreprises(1) pour l'enseignement.	8.3
12. Education - Enseignement.		9.0
13. Hospitals and welfare organizations - Hôpitaux et services sociaux.	Number of employees as tabulated for the preparation of <u>Estimates of Employees by Province and Industry</u> , Catalogue 72-514, combined with an average earnings series derived from contract settlements as reported in <u>Labour Canada Publication Collective Bargaining Review</u> - Nombre de salariés calculé pour la publication <u>Estimations du nombre de salariés par province et par industrie</u> , n° 72-514 au catalogue, et gains moyens calculés à partir des contrats de travail signalés dans la <u>Revue de la négociation collective</u> publiée par Travail Canada.	6.0
14. Religious organizations and private households - Organisations culturelles et ménages privés.	Previous year's trend used to allocate estimated annual totals - Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	1.0
15. Federal administration - Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Federal Government Employment</u> , Catalogue 72-004 - Salaires et traitements fondées sur les données établies pour <u>L'emploi dans l'administration fédérale</u> , n° 72-004 au catalogue.	3.8
16. Provincial administration - Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Provincial Government Employment</u> , Catalogue 72-007 - Salaires et traitements fondées sur les données établies pour <u>L'emploi dans les administrations publiques provinciales</u> , n° 72-007 au catalogue.	2.9
17. Local administration - Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Local Government Employment</u> , Catalogue 72-009 - Salaires et traitements fondées sur les données établies pour <u>L'emploi dans les administrations locales</u> , n° 72-009 au catalogue.	2.1
18. Other government offices - Autres services gouvernementaux.	Projected on the same basis as federal administration - Projections sur la même base que pour l'administration fédérale.	..

See footnotes on page 40. - Voir notes à la page 40.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used, i.e., the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

## Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) Annual and monthly estimates for the industries for Canada and by province of which the estimates for 1971 are considered final and those for 1972 to date are preliminary;
- (b) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

Although the monthly estimates of wages and salaries are derived for 18 industry groups by province, publication or release of the provincial industry estimates are subject to confidentiality and reliability constraints. The criteria used for selection of industry data by province for publication were based on the level and proportion of the employment series of the source used to derive the wages and salaries estimate to the total estimated employment for that industry. For some provinces, certain industries were combined such that the constraints would be met.

The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Goods-producing industry - The sum of agriculture, fishing, hunting and trapping, forestry, mining, manufacturing, and construction industries.

See footnotes on page 40.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés, c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises(1) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et/ou de jours de paye pendant le mois.

## Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) Estimations annuelles et mensuelles pour les branches d'activité au Canada et par province, les estimations de 1971 étant définitives et celles pour la période de 1972 à aujourd'hui, provisoires;
- b) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

Bien que les estimations mensuelles des salaires et traitements soient calculées pour 18 branches d'activité économique par province, la publication ou la diffusion des estimations provinciales sont soumises à la fiabilité et à la confidentialité. Les critères de sélection des données relatives à une activité économique par province et destinées à la publication sont basés sur le niveau et sur la proportion des effectifs de la source utilisée pour le calcul des estimations des salaires et traitements par rapport à l'effectif total estimatif de cette activité économique. Pour quelques provinces, on a fusionné certaines activités économiques afin de respecter les restrictions susmentionnées.

Les tableaux contiennent quelques branches qui ne figurent pas dans la Classification des activités économiques, notamment:

Industrie de biens - Englobe l'agriculture, la pêche, la chasse et le piégeage, les forêts, les mines, les industries manufacturières et la construction.

Voir notes à la page 40.

Service-producing industry - The sum of transportation, communication, and other utilities, trade, finance, insurance, and real estate, community, business and personal service, and public administration and defence industries.

Domestic services - The sum of babysitters, private duty nurses, and private households industries.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period. Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment, Earnings and Hours, Catalogue 72-002.
- (2) The results of these surveys are published in Federal Government Employment, Catalogue 72-004, Provincial Government Employment, Catalogue 72-007 and Local Government Employment, Catalogue 72-009.

Industrie de services - Englobe les transports, les communications et autres services publics, le commerce, la finance, les assurances et l'immeuble, les services communautaires, commerciaux et personnels, l'administration publique et la défense.

Services à domicile - Englobent les gardiennes d'enfants, les infirmières de service privé et les ménages.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins 20 personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période. On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de Emploi, gains et heures de travail, n° 72-002 au catalogue.
- (2) Les résultats de ces enquêtes sont publiés dans L'emploi dans l'administration fédérale, n° 72-004 au catalogue, L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue, et L'emploi dans les administrations locales, n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

72-005 Estimations du revenu du travail. Bil.

### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées. Bil.

### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-508 Estimations du nombre d'employés par province et industrie. Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie. Bil.

72-514 Estimations du nombre d'employés par province et par industrie. Bil.

### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970. Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972. Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973. Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970. Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970. Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971. Bil.

72-613 Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972. Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

72-002    Employment, Earnings and Hours. Bil.

72-005    Estimates of Labour Income. Bil.

### Annual

72-206    Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

### Occasional

72-506    Labour Costs in Manufacturing. Bil.

72-508    Estimates of Employees by Province and Industry. Bil.

72-510    Labour Costs in Manufacturing. Bil.

72-511    Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.

72-513    Estimates of Employees by Province and Industry. Bil.

72-514    Estimates of Employees by Province and Industry. Bil.

### Annual/Various

72-601    Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.

72-602    Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.

72-603    Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.

72-610    Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.

72-611    Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.

72-612    Labour Costs in Canada: Manufacturing, 1971. Bil.

72-613    Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

— nil or zero.

- - amount too small to be expressed.

<sup>p</sup> preliminary figures.

<sup>r</sup> revised figures.

<sup>x</sup> confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

- - nombres infimes.

<sup>p</sup> nombres provisoires.

<sup>r</sup> nombres rectifiés.

<sup>x</sup> confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

April-June - 1976 - Avril-juin

During the second quarter of 1976 labour income, adjusted for seasonal variation, increased by 4.7 per cent; this compares to a gain of 4.4 per cent during the previous quarter.

The main increase in the second quarter occurred during May and was primarily due to two factors: a 17 per cent advance payment of retroactive pay to the Quebec public sector employees and an increase in employer paid premiums to the Ontario Health Insurance Plan. If the effects of irregularities such as the above, strikes and other special lump sum payments are removed the seasonally adjusted second quarter estimates show an increase of 2.8 per cent; in comparison, the first quarter shows a gain of 4.1 per cent. Except for the federal and provincial governments all industry divisions contributed to a decline in the rate of growth.

Wages and salaries in the goods-producing industries, adjusted for seasonal variation, advanced by 2.3 per cent during the second quarter, this is down from 4.9 per cent recorded during the previous period. Removing strike and special lump sum payments effects, the respective percentages are 1.6 and 3.9.

In the service-producing industries, seasonally adjusted wages and salaries increased by 5.6 per cent during the most recent period; by comparison, the advance was 3.7 per cent for the first quarter. Removing strikes and special payments, the gain was 2.8 per cent and 3.7 per cent for the respective quarters. The acceleration in the rate of growth was mainly the result of retroactive payments received by the Quebec public sector employees.

Au cours du deuxième trimestre de 1976, le revenu désaisonnalisé du travail a augmenté de 4.7 %, alors qu'il avait progressé de 4.4 % au cours du trimestre précédent.

Au deuxième trimestre, l'augmentation la plus importante s'est produite en mai et était surtout attribuable à deux facteurs: des paiements anticipés de 17 % au titre d'un rappel de salaire versés aux employés du secteur public du Québec et une augmentation des primes payées par l'employeur au Régime d'assurance-maladie de l'Ontario. Si l'on fait abstraction des répercussions entraînées par ces facteurs ainsi que par les grèves et par le versement d'autres montants forfaitaires spéciaux, les estimations désaisonnalisées du deuxième trimestre feront ressortir une augmentation de 2.8 %, en comparaison d'une augmentation de 4.1 % enregistrée au premier trimestre. À l'exception des administrations fédérale et provinciales, toutes les divisions de l'activité économique ont contribué à une baisse du taux d'accroissement.

Au cours du deuxième trimestre, les salaires et les traitements désaisonnalisés ont progressé de 2.3 % dans les industries de biens, alors que l'augmentation était de 4.9 % au cours de la période précédente. Si l'on ne tient pas compte des grèves et des montants forfaitaires spéciaux, ces proportions sont respectivement de 1.6 % et de 3.9 %.

Au cours de la période la plus récente, les salaires et les traitements désaisonnalisés ont augmenté de 5.6 % dans les industries de services, comparativement à une augmentation de 3.7 % au cours du premier trimestre. Si l'on fait abstraction des grèves et des montants forfaitaires spéciaux, les augmentations pour ces trimestres ont été respectivement de 2.8 % et de 3.7 %. L'augmentation du taux d'accroissement provient en grande partie des rappels touchés par les employés du secteur public du Québec.

(3) THE DIFFERENCE BETWEEN THE SUM OF THE PROVINCES AND CANADA TOTALS, WHICH INCLUDE YUKON, NORTHWEST TERRITORIES AND CANADIAN RESIDENTS ABROAD, CONTAINS A RESIDUAL ERROR RESULTING FROM SEASONALLY ADJUSTING BY PROVINCE AND BY INDUSTRY. - LA DIFFERENCE ENTRE LA SOMME DES CHIFFRES POUR LES PROVINCES ET LES TOTAUX DU CANADA, QUI COMPRENNENT LE YUKON, LES TERRITOIRES DU NORD-OUEST ET LES RESIDENTS DU CANADA A L'ETRANGER, RENFERME UNE ERREUR RESIDUELLE PROVENANT DE LA DESAISONNALISATION PAR PROVINCE ET PAR BRANCHE D'ACTIVITE ECONOMIQUE.

Labour income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms.(1)
- (b) Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.(2)

Separate monthly estimates of wages and salaries are prepared for each province for 18 industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate benchmark data to months and to project from November 1975 to obtain 1976 data, are shown below for the 18 groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définis plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour 18 branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de référence aux mois et à projeter les données de 1976 à partir des estimations de novembre 1975 figurent ci-dessous pour les 18 branches pour lesquelles il est établi des estimations au niveau provincial:

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1975 Total wages and salaries = 100% — Poids — Rémunérations totales 1975 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics, Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Catalogue 23-207 — Valeur des poissons pris et débarqués, selon La statistique mensuelle des pêches du Canada, n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication Production de fourrures, n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.0
5. Mining — Mines.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment, Earnings and Hours, Catalogue 72-002 — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication Emploi, gains et heures de travail, n° 72-002 au catalogue.	2.5
6. Manufacturing — Industries manufacturières.		22.9
7. Construction.		9.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		10.3
9. Trade — Commerce.		13.8
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		6.1
11. Commercial services — Services commerciaux.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514, combined with average earnings in the large firms(1) for education — Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue, et gains moyens dans les grandes entreprises(1) pour l'enseignement.	8.3
12. Education — Enseignement.		9.0
13. Hospitals and welfare organizations — Hôpitaux et services sociaux.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514, combined with an average earnings series derived from contract settlements as reported in Labour Canada Publication Collective Bargaining Review — Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue, et gains moyens calculés à partir des contrats de travail signalés dans la Revue de la négociation collective publiée par Travail Canada.	6.0
14. Religious organizations and private households — Organisations culturelles et ménages privés.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Catalogue 72-004 — Salaires et traitements fondées sur les données établies pour L'emploi dans l'administration fédérale, n° 72-004 au catalogue.	3.8
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Catalogue 72-007 — Salaires et traitements fondées sur les données établies pour L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue.	2.9
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment, Catalogue 72-009 — Salaires et traitements fondées sur les données établies pour L'emploi dans les administrations locales, n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration — Projections sur la même base que pour l'administration fédérale.	..

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used, i.e., the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

## Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) Annual and monthly estimates for the industries for Canada and by province of which the estimates for 1971 are considered final and those for 1972 to date are preliminary;
- (b) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

Although the monthly estimates of wages and salaries are derived for 18 industry groups by province, publication or release of the provincial industry estimates are subject to confidentiality and reliability constraints. The criteria used for selection of industry data by province for publication were based on the level and proportion of the employment series of the source used to derive the wages and salaries estimate to the total estimated employment for that industry. For some provinces, certain industries were combined such that the constraints would be met.

The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Goods-producing industry - The sum of agriculture, fishing, hunting and trapping, forestry, mining, manufacturing, and construction industries.

See footnotes on page 40.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés, c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises(1) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et/ou de jours de paye pendant le mois.

## Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) Estimations annuelles et mensuelles pour les branches d'activité au Canada et par province, les estimations de 1971 étant définitives et celles pour la période de 1972 à aujourd'hui, provisoires;
- b) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

Bien que les estimations mensuelles des salaires et traitements soient calculées pour 18 branches d'activité économique par province, la publication ou la diffusion des estimations provinciales sont soumises à la fiabilité et à la confidentialité. Les critères de sélection des données relatives à une activité économique par province et destinées à la publication sont basés sur le niveau et sur la proportion des effectifs de la source utilisée pour le calcul des estimations des salaires et traitements par rapport à l'effectif total estimatif de cette activité économique. Pour quelques provinces, on a fusionné certaines activités économiques afin de respecter les restrictions susmentionnées.

Les tableaux contiennent quelques branches qui ne figurent pas dans la Classification des activités économiques, notamment:

Industrie de biens - Englobe l'agriculture, la pêche, la chasse et le piégeage, les forêts, les mines, les industries manufacturières et la construction.

Voir notes à la page 40.

Service-producing industry - The sum of transportation, communication, and other utilities, trade, finance, insurance, and real estate, community, business and personal service, and public administration and defence industries.

Domestic services - The sum of babysitters, private duty nurses, and private households industries.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period. Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment, Earnings and Hours, Catalogue 72-002.
- (2) The results of these surveys are published in Federal Government Employment, Catalogue 72-004, Provincial Government Employment, Catalogue 72-007 and Local Government Employment, Catalogue 72-009.

Industrie de services - Englobe les transports, les communications et autres services publics, le commerce, la finance, les assurances et l'immeuble, les services communautaires, commerciaux et personnels, l'administration publique et la défense.

Services à domicile - Englobent les gardiennes d'enfants, les infirmières de service privé et les ménages.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins 20 personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période. On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de Emploi, gains et heures de travail, n° 72-002 au catalogue.
- (2) Les résultats de ces enquêtes sont publiés dans L'emploi dans l'administration fédérale, n° 72-004 au catalogue, L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue, et L'emploi dans les administrations locales, n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement :

### Catalogue

#### Mensuel

- 72-002    Emploi, gains et durée du travail. Bil.
- 72-005    Estimations du revenu du travail. Bil.

#### Annuel

- 72-206    Emploi, rémunérations et heures séries désaisonnalisées. Bil.

#### Hors série

- 72-506    Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.
- 72-508    Estimations du nombre d'employés par province et industrie. Bil.
- 72-510    Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.
- 72-511    Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.
- 72-513    Estimations du nombre d'employés par province et par industrie. Bil.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- <sup>p</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- <sup>p</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## ESTIMATES OF LABOUR INCOME

## ESTIMATIONS DU REVENU DU TRAVAIL

July-September - 1976 - Juillet-septembre

During the third quarter of 1976, seasonally-adjusted labour income increased by 1.4 per cent. The respective first and second quarter gains were 4.4 and 5.0 per cent.

The change between the second and third quarter was dampened by large retroactive payments received by Quebec public sector employees and increased employer paid premiums to the Ontario Health Insurance Plan during the second quarter. In addition, the third quarter estimates were reduced because of major construction industry strikes in Quebec and British Columbia.

Without the effects of strikes and retro-active payments the seasonally-adjusted third quarter would show and identical rate of growth of 3.1 per cent that would have been displayed during the previous quarter.

The labour income estimates unadjusted for seasonal variation, showed an increase of 0.9 per cent between the second and third quarter. On a year-over-year basis the gain amounted to 13.1 per cent. Without the effects of strikes and retro-active payments the quarter-over-quarter changes would have been reduced from 6.4 per cent in the second quarter to 2.6 per cent in the third quarter.

Seasonally-adjusted wages and salaries in the goods-producing industries declined by 0.1 per cent during the third quarter; this compares to an increase of 2.5 per cent during the previous quarter. In the service-producing industries the growth in wages and salaries declined from 6.1 per cent during the second quarter to 1.6 per cent during the following three months.

Au cours du troisième trimestre de 1976, le revenu désaisonnalisé du travail a augmenté de 1.4 %. Les progressions respectives observées au premier et au deuxième trimestre se chiffraient à 4.4 % et à 5.0 %.

Plusieurs facteurs ont atténué la variation enregistrée entre le deuxième et le troisième trimestre; il s'agit, au deuxième trimestre, des rappels importants versés aux employés du secteur public du Québec et de l'augmentation des primes payées par l'employeur au Régime d'assurance-maladie de l'Ontario. De plus, les estimations du troisième trimestre ont été réduites à cause des grèves importantes qu'a connues l'industrie de la construction au Québec et en Colombie-Britannique.

Si l'on ne tient pas compte des effets des grèves et des rappels pour ces deux périodes, les estimations désaisonnalisées du troisième trimestre révèlent un taux d'accroissement de 3.1 %, taux identique à celui observé au trimestre précédent.

Les estimations non désaisonnalisées du revenu du travail révèlent une augmentation de 0.9 % entre le deuxième et le troisième trimestre. D'une année à l'autre, la progression s'établit à 13.1 %. Si l'on fait abstraction de l'effet des grèves et des rappels, le taux de variation d'un trimestre à l'autre passe de 6.4 % au deuxième trimestre à 2.6 % au troisième trimestre.

Au cours du troisième trimestre, les salaires et les traitements désaisonnalisés ont regressé de 0.1 % dans les industries de biens, alors qu'ils avaient progressé de 2.5 % au trimestre précédent. Dans les industries de services, le taux d'accroissement des salaires et des traitements est passé de 6.1 % au deuxième trimestre à 1.6 % au troisième trimestre.

(3) THE DIFFERENCE BETWEEN THE SUM OF THE PROVINCES AND CANADA TOTALS, WHICH INCLUDE YUKON, NORTHWEST TERRITORIES AND CANADIAN RESIDENTS ABROAD, CONTAINS A RESIDUAL ERROR RESULTING FROM SEASONALLY ADJUSTING BY PROVINCE AND BY INDUSTRY. - LA DIFFERENCE ENTRE LA SOMME DES CHIFFRES POUR LES PROVINCES ET LES TOTAUX DU CANADA, QUI COMPRENNENT LE YUKON, LES TERRITOIRES DU NORD-OUEST ET LES RESIDENTS DU CANADA A L'ETRANGER, RENFERME UNE ERREUR RESIDUELLE PROVENANT DE LA DESAISONNALISATION PAR PROVINCE ET PAR BRANCHE D'ACTIVITE ECONOMIQUE.

Labour income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms.(1)
- (b) Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.(2)

Separate monthly estimates of wages and salaries are prepared for each province for 18 industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate benchmark data to months and to project from November 1975 to obtain 1976 data, are shown below for the 18 groups for which separate provincial estimates are prepared:

See footnotes on page 40.

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définis plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour 18 branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de référence aux mois et à projeter les données de 1976 à partir des estimations de novembre 1975 figurent ci-dessous pour les 18 branches pour lesquelles il est établi des estimations au niveau provincial:

Voir notes à la page 40.

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1975 Total wages and salaries = 100% — Poids — Rémunérations totales 1975 = 100 %

13. Hospitals and welfare organizations — Hôpitaux et services sociaux.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514, combined with an average earnings series derived from contract settlements as reported in Labour Canada Publication Collective Bargaining Review — Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue, et gains moyens calculés à partir des contrats de travail signalés dans la Revue de la négociation collective publiée par Travail Canada.	6.0
14. Religious organizations and private households — Organisations culturelles et ménages privés.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Catalogue 72-004 — Salaires et traitements fondées sur les données établies pour L'emploi dans l'administration fédérale, n° 72-004 au catalogue.	3.8
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Catalogue 72-007 — Salaires et traitements fondées sur les données établies pour L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue.	2.9
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment, Catalogue 72-009 — Salaires et traitements fondées sur les données établies pour L'emploi dans les administrations locales, n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration — Projections sur la même base que pour l'administration fédérale.	..

See footnotes on page 40. — Voir notes à la page 40.

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used, i.e., the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) Annual and monthly estimates for the industries for Canada and by province of which the estimates for 1971 are considered final and those for 1972 to date are preliminary;
- (b) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

Although the monthly estimates of wages and salaries are derived for 18 industry groups by province, publication or release of the provincial industry estimates are subject to confidentiality and reliability constraints. The criteria used for selection of industry data by province for publication were based on the level and proportion of the employment series of the source used to derive the wages and salaries estimate to the total estimated employment for that industry. For some provinces, certain industries were combined such that the constraints would be met.

The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Goods-producing industry - The sum of agriculture, fishing, hunting and trapping, forestry, mining, manufacturing, and construction industries.

See footnotes on page 40.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés, c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises(1) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et/ou de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) Estimations annuelles et mensuelles pour les branches d'activité au Canada et par province, les estimations de 1971 étant définitives et celles pour la période de 1972 à aujourd'hui, provisoires;
- b) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

Bien que les estimations mensuelles des salaires et traitements soient calculées pour 18 branches d'activité économique par province, la publication ou la diffusion des estimations provinciales sont soumises à la fiabilité et à la confidentialité. Les critères de sélection des données relatives à une activité économique par province et destinées à la publication sont basés sur le niveau et sur la proportion des effectifs de la source utilisée pour le calcul des estimations des salaires et traitements par rapport à l'effectif total estimatif de cette activité économique. Pour quelques provinces, on a fusionné certaines activités économiques afin de respecter les restrictions susmentionnées.

Les tableaux contiennent quelques branches qui ne figurent pas dans la Classification des activités économiques, notamment:

Industrie de biens - Englobe l'agriculture, la pêche, la chasse et le piégeage, les forêts, les mines, les industries manufacturières et la construction.

Voir notes à la page 40.

Service-producing industry - The sum of transportation, communication, and other utilities, trade, finance, insurance, and real estate, community, business and personal service, and public administration and defence industries.

Domestic services - The sum of babysitters, private duty nurses, and private households industries.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period. Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment, Earnings and Hours, Catalogue 72-002.
- (2) The results of these surveys are published in Federal Government Employment, Catalogue 72-004, Provincial Government Employment, Catalogue 72-007 and Local Government Employment, Catalogue 72-009.

Industrie de services - Englobe les transports, les communications et autres services publics, le commerce, la finance, les assurances et l'immeuble, les services communautaires, commerciaux et personnels, l'administration publique et la défense.

Services à domicile - Englobent les gardiennes d'enfants, les infirmières de service privé et les ménages.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins 20 personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période. On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de Emploi, gains et heures de travail, n° 72-002 au catalogue.
- (2) Les résultats de ces enquêtes sont publiés dans L'emploi dans l'administration fédérale, n° 72-004 au catalogue, L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue, et L'emploi dans les administrations locales, n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

## Wages, Salaries and Supplementary Labour Income

Basis: 1960 Standard Industrial Classification

## Salaires, traitements et revenu supplémentaire du travail

Base: classification type des industries de 1960

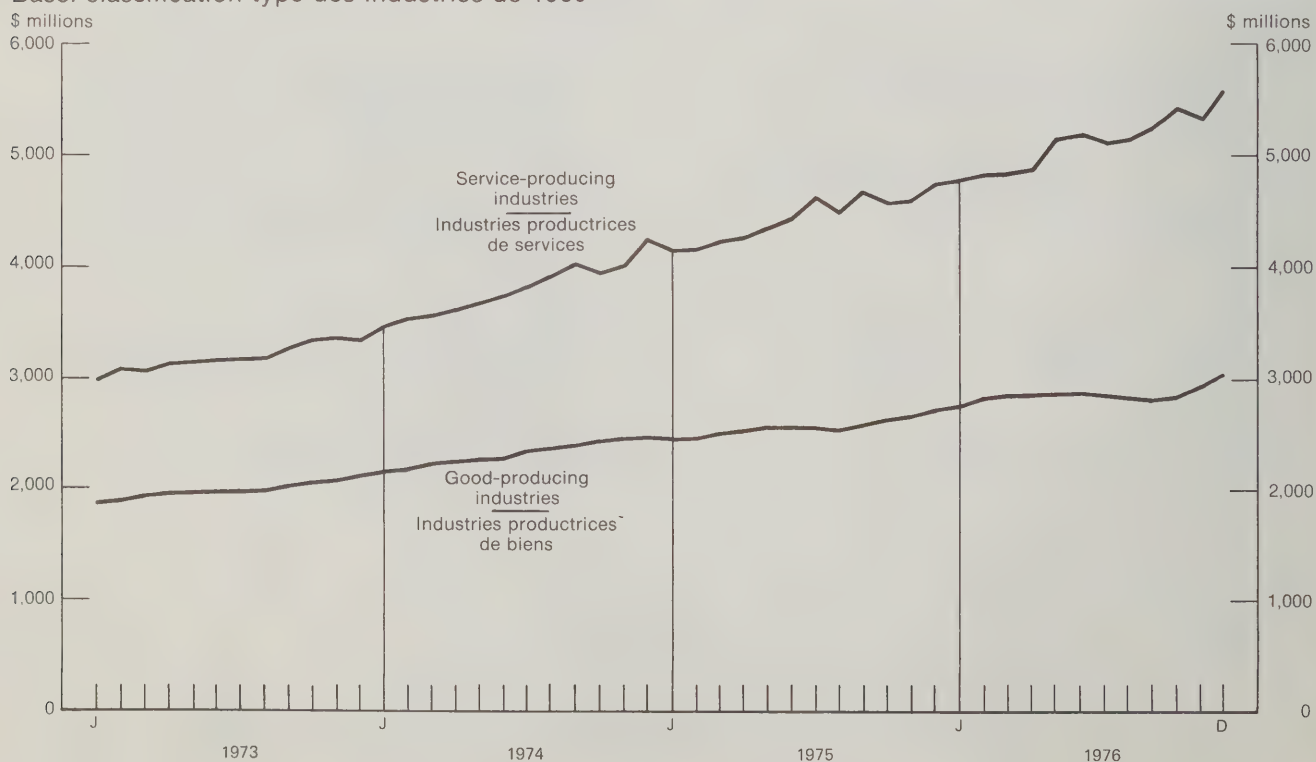

## Wages and Salaries in the Goods-producing and the Service-producing Industries — Seasonally Adjusted

Basis: 1960 Standard Industrial Classification

## Salaires et traitements dans les industries de biens et les industries de services — Chiffres désaisonnalisés

Base: classification type des industries de 1960

## INTRODUCTION

Labour income, comprising wages and salaries and supplementary labour income, is defined as total compensation for work done or services rendered by paid workers in Canada; excluded are payments received by members of the Canadian Armed Forces. For an explanation of how the labour income estimates are constructed the reader is referred to Concepts and Methods on page 37. A summary of current labour income estimates is shown in the table below.

Please note that the estimates for Transportation, Communications and Utilities for the years 1971 to 1975 in Newfoundland, Nova Scotia, New Brunswick, Manitoba and Saskatchewan have been incorrectly stated in previous 1976 publications of Estimates of Labour Income.

Le revenu du travail, qui comprend les salaires, les traitements et le revenu supplémentaire du travail, désigne la rémunération totale versée aux travailleurs au Canada pour le travail qu'ils accomplissent ou les services qu'ils rendent; les paiements versés aux membres des Forces armées canadiennes sont exclus. Le lecteur doit consulter la rubrique Concepts et méthodes à la page 37 pour obtenir une explication de la façon dont sont établies les estimations du revenu du travail. Le tableau ci-dessous donne un résumé des estimations courantes du revenu du travail.

Veuillez noter que les estimations de 1971 à 1975 relatives aux transports, communications et services publics, qui figurent dans les publications précédentes de 1976 intitulées Estimations du revenu du travail, comportent des erreurs dans le cas de Terre-Neuve, de la Nouvelle-Écosse, du Nouveau-Brunswick, du Manitoba et de la Saskatchewan.

### Summary of Labour Income Estimates Basis: 1960 Standard Industrial Classification

### Sommaire des estimations du revenu du travail Base: Classification type des industries de 1960

	Unadjusted for seasonal variation — Chiffres non désaisonnalisés		Adjusted for seasonal variation — Chiffres désaisonnalisés		Labour income unadjusted for seasonal variations, prior to adjustments for strikes and retroactive payments(1) — Revenu du travail non désaisonnalisé, avant redressements pour grèves et rappels(1)
	Wages and salaries — Salaires et traitements	Labour income — Revenu du travail	Wages and salaries — Salaires et traitements	Labour income — Revenu du travail

(3) THE DIFFERENCE BETWEEN THE SUM OF THE PROVINCES AND CANADA TOTALS, WHICH INCLUDE YUKON, NORTHWEST TERRITORIES AND CANADIAN RESIDENTS ABROAD, CONTAINS A RESIDUAL ERROR RESULTING FROM SEASONALLY ADJUSTING BY PROVINCE AND BY INDUSTRY. - LA DIFFERENCE ENTRE LA SOMME DES CHIFFRES POUR LES PROVINCES ET LES TOTAUX DU CANADA, QUI COMPRENNENT LE YUKON, LES TERRITOIRES DU NORD-OUEST ET LES RESIDENTS DU CANADA A L'ETRANGER, RENFERME UNE ERREUR RESIDUELLE PROVENANT DE LA DESAISONNALISATION PAR PROVINCE ET PAR BRANCHE D'ACTIVITE ECONOMIQUE.

Labour income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms.(1)
- (b) Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.(2)

Separate monthly estimates of wages and salaries are prepared for each province for 18 industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate benchmark data to months and to project from November 1975 to obtain 1976 data, are shown below for the 18 groups for which separate provincial estimates are prepared:

See footnotes on page 40.

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définis plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- a) Indice de la rémunération dans les grandes entreprises(1).
- b) Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue.
- c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour 18 branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de référence aux mois et à projeter les données de 1976 à partir des estimations de novembre 1975 figurent ci-dessous pour les 18 branches pour lesquelles il est établi des estimations au niveau provincial:

Voir notes à la page 40.

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1975 total wages and salaries = 100% — Poids — Rémunérations totales 1975 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche. 3. Hunting and trapping — Chasse et piégeage.	Value of fish caught and landed as published in <u>Fisheries Statistics</u> , Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of <u>Fur Production</u> , Catalogue 23-207 — Valeur des poissons pris et débarqués, selon <u>La statistique mensuelle des pêches du Canada</u> , n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication <u>Production de fourrures</u> , n° 23-207 au catalogue.	0.1
4. Forestry — Forêts.		1.0
5. Mining — Mines.		2.5
6. Manufacturing — Industries manufacturières.		22.9
7. Construction.		9.3
8. Transportation, communication and other utilities — Transports, communications et autres services publics.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of <u>Employment, Earnings and Hours</u> , Catalogue 72-002 — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication <u>Emploi, gains et heures de travail</u> , n° 72-002 au catalogue.	10.3
9. Trade — Commerce.		13.8
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		6.1
11. Commercial services — Services commerciaux.		8.3
12. Education — Enseignement.	Number of employees as tabulated for the preparation of <u>Estimates of Employees by Province and Industry</u> , Catalogue 72-514, combined with average earnings in the large firms(1) for education — Nombre de salariés calculé pour la publication <u>Estimations du nombre de salariés par province et par industrie</u> , n° 72-514 au catalogue, et gains moyens dans les grandes entreprises(1) pour l'enseignement.	9.0
13. Hospitals and welfare organizations — Hôpitaux et services sociaux.	Number of employees as tabulated for the preparation of <u>Estimates of Employees by Province and Industry</u> , Catalogue 72-514, combined with an average earnings series derived from contract settlements as reported in <u>Labour Canada Publication Collective Bargaining Review</u> — Nombre de salariés calculé pour la publication <u>Estimations du nombre de salariés par province et par industrie</u> , n° 72-514 au catalogue, et gains moyens calculés à partir des contrats de travail signalés dans la <u>Revue de la négociation collective</u> publiée par Travail Canada.	6.0
14. Religious organizations and private households — Organisations culturelles et ménages privés.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	1.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Federal Government Employment</u> , Catalogue 72-004 — Salaires et traitements fondées sur les données établies pour <u>L'emploi dans l'administration fédérale</u> , n° 72-004 au catalogue.	3.8
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Provincial Government Employment</u> , Catalogue 72-007 — Salaires et traitements fondées sur les données établies pour <u>L'emploi dans les administrations publiques provinciales</u> , n° 72-007 au catalogue.	2.9
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Local Government Employment</u> , Catalogue 72-009 — Salaires et traitements fondées sur les données établies pour <u>L'emploi dans les administrations locales</u> , n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration — Projections sur la même base que pour l'administration fédérale.	..

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used, i.e., the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

#### Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

The estimates for the last four years are revised each year to incorporate the latest annual data available. The estimates contained in this publication are as follows:

- (a) Annual and monthly estimates for the industries for Canada and by province of which the estimates for 1971 are considered final and those for 1972 to date are preliminary;
- (b) final estimates not contained in this publication are available back to 1947 on request to the Monthly Employment, Payrolls and Labour Income Section, Statistics Canada.

Although the monthly estimates of wages and salaries are derived for 18 industry groups by province, publication or release of the provincial industry estimates are subject to confidentiality and reliability constraints. The criteria used for selection of industry data by province for publication were based on the level and proportion of the employment series of the source used to derive the wages and salaries estimate to the total estimated employment for that industry. For some provinces, certain industries were combined such that the constraints would be met.

The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Goods-producing industry - The sum of agriculture, fishing, hunting and trapping, forestry, mining, manufacturing and construction industries.

See footnotes on page 40.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés, c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises(1) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et/ou de jours de paye pendant le mois.

#### Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

Les estimations des quatre années les plus récentes sont rectifiées annuellement à la lumière des dernières données annuelles disponibles. Cette publication contient les estimations suivantes:

- a) Estimations annuelles et mensuelles pour les branches d'activité au Canada et par province, les estimations de 1971 étant définitives et celles pour la période de 1972 à aujourd'hui, provisoires;
- b) on peut se procurer les estimations définitives depuis 1947 qui ne figurent pas ici en s'adressant à la Section de l'emploi, de la rémunération et du revenu du travail, Statistique Canada.

Bien que les estimations mensuelles des salaires et traitements soient calculées pour 18 branches d'activité économique par province, la publication ou la diffusion des estimations provinciales sont soumises à la fiabilité et à la confidentialité. Les critères de sélection des données relatives à une activité économique par province et destinées à la publication sont basés sur le niveau et sur la proportion des effectifs de la source utilisée pour le calcul des estimations des salaires et traitements par rapport à l'effectif total estimatif de cette activité économique. Pour quelques provinces, on a fusionné certaines activités économiques afin de respecter les restrictions susmentionnées.

Les tableaux contiennent quelques branches qui ne figurent pas dans la Classification des activités économiques, notamment:

Industrie de biens - Englobe l'agriculture, la pêche, la chasse et le piégeage, les forêts, les mines, les industries manufacturières et la construction.

Voir notes à la page 40.

Service-producing industry - The sum of transportation, communication and other utilities, trade, finance, insurance and real estate, community, business and personal service and public administration and defence industries.

Domestic services - The sum of babysitters, private duty nurses and private households industries.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period. Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment, Earnings and Hours, Catalogue 72-002.
- (2) The results of these surveys are published in Federal Government Employment, Catalogue 72-004, Provincial Government Employment, Catalogue 72-007 and Local Government Employment, Catalogue 72-009.

Industrie de services - Englobe les transports, les communications et autres services publics, le commerce, la finance, les assurances et l'immeuble, les services communautaires, commerciaux et personnels, l'administration publique et la défense.

Services à domicile - Englobent les gardiennes d'enfants, les infirmières de service privé et les ménages.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins 20 personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période. On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de Emploi, gains et heures de travail, n° 72-002 au catalogue.
- (2) Les résultats de ces enquêtes sont publiés dans L'emploi dans l'administration fédérale, n° 72-004 au catalogue, L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue, et L'emploi dans les administrations locales, n° 72-009 au catalogue.

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

- 72-002    **Emploi, gains et durée du travail.** Bil.
- 72-005    **Estimations du revenu du travail.** Bil.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

Please note that the labour income estimates for the first quarter of 1977 have been increased from those originally published in the Statistics Canada Daily by \$148 million (\$152 million seasonally adjusted). This revision was the result of macro-economic information supplied by the System of National Accounts Branch (current) to the Labour Income Section.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivant sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## NOTA

Veuillez noter que les estimations du revenu du travail pour le premier trimestre de 1977 dépassent de \$148 millions (chiffre désaisonnalisé: \$152 millions) celles publiées à l'origine dans le Quotidien de Statistique Canada. La Section du revenu du travail effectué cette révision en fonction des renseignements macro-économiques que lui a fournis la Direction du système des comptes nationaux (courants).

Basis: 1960 Standard Industrial Classification

## Salaires et traitements dans les industries de biens et les industries de services — Chiffres désaisonnalisés

Base: classification type des industries de 1960

# SUMMARY OF LABOUR INCOME ESTIMATES

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Not included in labour income are military pay and allowances and income received by self-employed persons, for example, independent professionals, proprietors of unincorporated businesses and farmers. A more detailed description of the estimates and their method of construction is found in the section "Concepts and Methods" on page 43.

When perusing the tables two types of variances and the reasons for their occurrences should be noted: first, some columns and rows do not sum to the totals shown because of rounding and second, residual errors resulting from separate seasonal adjustments by province and by industry may be observed in the respective Canada totals. A summary of the current labour income estimates is shown in the table immediately below.

# SOMMAIRE DES ESTIMATIONS DU REVENU DU TRAVAIL

Le revenu du travail, qui comprend les salaires, les traitements et le revenu supplémentaire du travail, désigne toute rémunération versée aux salariés résident au Canada. Ne sont pas compris dans le revenu du travail les soldes et les indemnités militaires ainsi que le revenu que touchent les travailleurs autonomes comme les professionnels indépendants, les propriétaires d'entreprises individuelles et les cultivateurs. On trouvera une description plus détaillée des estimations et de leur méthode de calcul sous la rubrique "Concepts et méthodes", à la page 43.

En examinant les tableaux, on notera deux sortes de variances. Voici les raisons de leur présence: d'abord, les sommes des éléments de quelques colonnes et lignes ne correspondent pas aux totaux indiqués à cause de l'arrondissement; ensuite, les totaux respectifs canadiens comportent des erreurs résiduelles résultant des désaisonnalisations effectuées à l'échelle provinciale et sectorielle. Le tableau ci-dessous donne un résumé des estimations courantes du revenu du travail.

## Summary of Labour Income Estimates Basis: 1960 Standard Industrial Classification

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. By definition this includes Canadians who are employed abroad by the federal government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers. Military pay and allowances which fit the definition of labour income are also excluded because they are shown as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retro-active wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Remuneration accumulating over time, for example, retro-active payments, are accounted for in the month and year in which they are paid.

Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance. Annual supplementary labour income benchmarks are derived by province and industry. The monthly estimates are calculated at the provincial level only; they are computed as fixed proportions of total provincial wages and salaries. The latest available annual supplementary labour income data by industry and component are shown in Tables I and II respectively.

The annual wages and salaries benchmarks are constructed from data sources providing the most complete coverage. Data sources include administrative records, censuses, sample surveys and estimates based on indirect measures in cases where there is no current information available.

Revenue Canada T4 taxation data is very similar to total wages and salaries as defined; therefore, these data have been selected to provide basic annual wages and salaries benchmarks for Canada. The 1977 annual revision of the labour income estimates incorporates a T4 level adjustment for the years 1973 to 1975 with a projection for the year 1976. The relative proportions of the individual industry benchmarks have not been revised.

Le revenu du travail, qui comprend les salaires et traitements et le revenu supplémentaire du travail, représente la rémunération totale versée aux salariés demeurant au Canada. Par définition, cela comprend les Canadiens travaillant à l'étranger pour l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les cultivateurs ne font pas partie du revenu du travail. La solde et les indemnités militaires rattachées à la définition de revenu du travail, mais ils sont également exclus car ils constituent un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, le revenu en nature, les allocations imposables et les rappels de salaire. Les estimations des salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc. La rémunération accumulée avec le temps, comme les rappels de salaire, est prise en compte durant le mois et l'année au cours desquels elle est versée.

Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage. Les données de référence annuelles relatives au revenu supplémentaire du travail sont établies par province et par branche d'activité. Les estimations mensuelles sont établies à l'échelle provinciale seulement; elles sont calculées en pourcentages fixes du total des salaires et traitements pour les provinces. Les données annuelles les plus récentes sur le revenu supplémentaire du travail, par branche d'activité et par composante, figurent aux tableaux I et II respectivement.

Les données de référence annuelles relatives aux salaires et traitements sont établies à partir de sources le plus exhaustives possible. Les sources de données comprennent les dossiers administratifs, les recensements, les enquêtes par sondage et les estimations fondées sur des mesures indirectes dans les cas où l'on ne dispose pas de données courantes.

Les données fiscales de Revenu Canada provenant des déclarations d'impôts T4 donnent une idée assez juste des salaires et traitements déjà définis; nous nous sommes donc servis de ces dernières afin d'établir les données de référence de base relatives aux salaires et traitements au Canada. La révision annuelle de 1977 des estimations du revenu du travail présente un redressement au niveau T4 pour les années 1973 à 1975 ainsi qu'une projection pour 1976. Les proportions relatives des données de référence liées à chaque entreprise n'ont pas été révisées.

Total .....	7,942.8	100.00

The monthly labour income estimates are projected from the established annual benchmarks by means of current employment and earnings indicators or historic trends if data are not available. The most important projectors are payroll indexes of large firms which are used to project about 74% of all monthly wages and salaries estimates. These payroll indexes are derived from earnings reported for a specified reference period in the Monthly Employment and Payroll Survey. The projectors for the 12 months of 1977 and their relative importance are shown in Table III.

### Statistical Presentation

The monthly wages and salaries estimates are prepared for each province and industry group shown in Table III. The latest monthly figures are advance estimates which are based on a limited number of reports. These data are less reliable than the estimates of preceding months which include additional information.

Estimates of labour income based on the 1948 Standard Industrial Classification have been released for the years 1926 to 1969 and are available on request from the Labour Income Section, Statistics Canada. Data based on the 1960 Standard Industrial Classification were first published in 1969 covering the period 1951 to 1968. These estimates were projected to the end of 1971. The entire series 1951 to 1971 has been revised and carried back to 1947 on the 1960 S.I.C.

The data contained in this publication have been revised for the years 1973 to 1976 to incorporate T4 earnings levels as reported to Revenue Canada. Earlier estimates from 1947 onward are available on request from the Labour Income Section, Statistics Canada. In addition, aggregated annual and monthly labour income data can be accessed from CANSIM.

Although the monthly estimates of wages and salaries are derived by province for 18 industry groups not all the detailed data are released because of confidentiality requirements and reliability constraints. The criteria for publication are based on the level and proportion of employment which is used to derive the wages and salaries estimates in relation to the total employment in any given industry.

Les estimations mensuelles du revenu du travail sont établies par la projection des données de référence annuelles à l'aide d'indicateurs de l'emploi et des gains courants ou des tendances si l'on ne dispose pas de données. Les coefficients de projection les plus importants sont les indices de la rémunération dans les grandes entreprises, qui servent à projeter environ 74 % de toutes les estimations mensuelles des salaires et traitements. Ces indices sont calculés à partir des gains déclarés pour une période de référence donnée dans le cadre de l'enquête mensuelle sur l'emploi et la rémunération. Le tableau III indique les coefficients de projection pour les 12 mois de 1977 ainsi que leur importance relative.

### Présentation statistique

Les estimations mensuelles des salaires et traitements sont établies par province et par branche d'activité; elles sont présentées au tableau III. Les chiffres mensuels les plus récents sont des estimations préliminaires fondées sur un nombre restreint de déclarations. Ces données ne sont pas aussi fiables que les estimations des mois précédents qui renferment des renseignements supplémentaires.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées pour les années de 1926 à 1969; vous pouvez en faire la demande auprès de la Section du revenu du travail à Statistique Canada. Les données fondées sur la Classification des industries de 1960 ont été publiées pour la première fois en 1969 et visaient la période allant de 1951 à 1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière, de 1951 à 1971, a été révisée et reportée à 1947 suivant la C.T.I. de 1960.

Les données de la présente publication ont été révisées pour les années 1973 à 1976 afin de tenir compte des niveaux des gains déclarés à Revenu Canada (T4). Vous pouvez vous procurer sur demande les estimations qui portent sur la période allant de 1947 à nos jours en vous adressant à la Section du revenu du travail à Statistique Canada. De plus, vous pouvez avoir accès aux données annuelles et mensuelles regroupées sur le revenu du travail par l'intermédiaire de CANSIM.

Bien que les estimations mensuelles des salaires et traitements soient calculées par province pour 18 branches d'activité économique, les renseignements détaillés ne sont pas tous diffusés en raison de restrictions en matière de confidentialité et de fiabilité. Les critères de publication se fondent sur le niveau et la proportion des effectifs utilisés pour établir les estimations des salaires et traitements par rapport à l'effectif total dans une branche d'activité donnée.

The industry data in this publication are aggregated to two groupings which are not found in the Standard Industrial Classification manual; these are the Goods-producing Industries (agriculture; fishing and trapping; forestry; mines, quarries and oil wells; manufacturing industries; and the construction industry) and the Service-producing Industries (transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal service industries; public administration).

Les données relatives aux branches d'activité présentées ici sont classées en deux groupes qui ne figurent pas dans la Classification type des industries: ce sont notamment les industries de biens (agriculture, pêche et piégeage, forêts, mines, carrières et puits de pétrole, industries manufacturières, bâtiment et travaux publics) et les industries de services (transports, communications et autres services publics, commerce, finances, assurances et affaires immobilières, services socio-culturels, commerciaux et personnels, administration publique).

TABLE III. Labour Income Data Sources and Weights

TABLEAU III. Poids et données de base du revenu du travail

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights - 1976 total wages and salaries = 100% — Poids - Rémunérations totales 1976 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals - Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing - Pêche.	Value of fish caught and landed as published in Fisheries Statistics, Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Catalogue 23-207 - Valeur des poissons pris et débarqués, selon La statistique mensuelle des pêches du Canada, n° 24-002 au catalogue et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication Production de fourrures, n° 23-207 au catalogue.	0.1
3. Hunting and trapping - Chasse et piégeage.		1.1
4. Forestry - Forêts.		2.6
5. Mining - Mines.		22.8
6. Manufacturing - Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment, Earnings and Hours, Catalogue 72-002 - Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication <u>Emploi, gains et heures de travail</u> , n° 72-002 au catalogue.	8.5
7. Construction.		10.5

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivant sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Basis: 1960 Standard Industrial Classification

## Salaires et traitements dans les industries de biens et les industries de services — Chiffres désaisonnalisés

Base: classification type des industries de 1960

# SUMMARY OF LABOUR INCOME ESTIMATES

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Not included in labour income are military pay and allowances and income received by self-employed persons, for example, independent professionals, proprietors of unincorporated businesses and farmers. A more detailed description of the estimates and their method of construction is found in the section "Concepts and Methods" on page 43.

When perusing the tables two types of variances and the reasons for their occurrences should be noted: first, some columns and rows do not sum to the totals shown because of rounding and second, residual errors resulting from separate seasonal adjustments by province and by industry may be observed in the respective Canada totals. A summary of the current labour income estimates is shown in the table immediately below.

# SOMMAIRE DES ESTIMATIONS DU REVENU DU TRAVAIL

Le revenu du travail, qui comprend les salaires, les traitements et le revenu supplémentaire du travail, désigne toute rémunération versée aux salariés résident au Canada. Ne sont pas compris dans le revenu du travail les soldes et les indemnités militaires ainsi que le revenu que touchent les travailleurs autonomes comme les professionnels indépendants, les propriétaires d'entreprises individuelles et les cultivateurs. On trouvera une description plus détaillée des estimations et de leur méthode de calcul sous la rubrique "Concepts et méthodes", à la page 43.

En examinant les tableaux, on notera deux sortes de variances. Voici les raisons de leur présence: d'abord, les sommes des éléments de quelques colonnes et lignes ne correspondent pas aux totaux indiqués à cause de l'arrondissement; ensuite, les totaux respectifs canadiens comportent des erreurs résiduelles résultant des désaisonnalisations effectuées à l'échelle provinciale et sectorielle. Le tableau ci-dessous donne un résumé des estimations courantes du revenu du travail.

## Summary of Labour Income Estimates Basis: 1960 Standard Industrial Classification

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. By definition this includes Canadians who are employed abroad by the federal government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers. Military pay and allowances which fit the definition of labour income are also excluded because they are shown as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retro-active wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Remuneration accumulating over time, for example, retro-active payments, are accounted for in the month and year in which they are paid.

Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance. Annual supplementary labour income benchmarks are derived by province and industry. The monthly estimates are calculated at the provincial level only; they are computed as fixed proportions of total provincial wages and salaries. The latest available annual supplementary labour income data by industry and component are shown in Tables I and II respectively.

The annual wages and salaries benchmarks are constructed from data sources providing the most complete coverage. Data sources include administrative records, censuses, sample surveys and estimates based on indirect measures in cases where there is no current information available.

Revenue Canada T4 taxation data is very similar to total wages and salaries as defined; therefore, these data have been selected to provide basic annual wages and salaries benchmarks for Canada. The 1977 annual revision of the labour income estimates incorporates a T4 level adjustment for the years 1973 to 1975 with a projection for the year 1976. The relative proportions of the individual industry benchmarks have not been revised.

Le revenu du travail, qui comprend les salaires et traitements et le revenu supplémentaire du travail, représente la rémunération totale versée aux salariés demeurant au Canada. Par définition, cela comprend les Canadiens travaillant à l'étranger pour l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les cultivateurs ne font pas partie du revenu du travail. La solde et les indemnités militaires répondent à la définition de revenu du travail, mais ils sont également exclus car ils constituent un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, le revenu en nature, les allocations imposables et les rappels de salaire. Les estimations des salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc. La rémunération accumulée avec le temps, comme les rappels de salaire, est prise en compte durant le mois et l'année au cours desquels elle est versée.

Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage. Les données de référence annuelles relatives au revenu supplémentaire du travail sont établies par province et par branche d'activité. Les estimations mensuelles sont établies à l'échelle provinciale seulement; elles sont calculées en pourcentages fixes du total des salaires et traitements pour les provinces. Les données annuelles les plus récentes sur le revenu supplémentaire du travail, par branche d'activité et par composante, figurent aux tableaux I et II respectivement.

Les données de référence annuelles relatives aux salaires et traitements sont établies à partir de sources le plus exhaustives possible. Les sources de données comprennent les dossiers administratifs, les recensements, les enquêtes par sondage et les estimations fondées sur des mesures indirectes dans les cas où l'on ne dispose pas de données courantes.

Les données fiscales de Revenu Canada provenant des déclarations d'impôts T4 donnent une idée assez juste des salaires et traitements déjà définis; nous nous sommes donc servis de ces dernières afin d'établir les données de référence de base relatives aux salaires et traitements au Canada. La révision annuelle de 1977 des estimations du revenu du travail présente un redressement au niveau T4 pour les années 1973 à 1975 ainsi qu'une projection pour 1976. Les proportions relatives des données de référence liées à chaque entreprise n'ont pas été révisées.

Canada and Quebec Pension Plan — Régime de pen- sions du Canada et Régime de rentes du Québec .....	1,054.0	13.27
Total .....	7,942.8	100.00

The monthly labour income estimates are projected from the established annual benchmarks by means of current employment and earnings indicators or historic trends if data are not available. The most important projectors are payroll indexes of large firms which are used to project about 74% of all monthly wages and salaries estimates. These payroll indexes are derived from earnings reported for a specified reference period in the Monthly Employment and Payroll Survey. The projectors for the 12 months of 1977 and their relative importance are shown in Table III.

### Statistical Presentation

The monthly wages and salaries estimates are prepared for each province and industry group shown in Table III. The latest monthly figures are advance estimates which are based on a limited number of reports. These data are less reliable than the estimates of preceding months which include additional information.

Estimates of labour income based on the 1948 Standard Industrial Classification have been released for the years 1926 to 1969 and are available on request from the Labour Income Section, Statistics Canada. Data based on the 1960 Standard Industrial Classification were first published in 1969 covering the period 1951 to 1968. These estimates were projected to the end of 1971. The entire series 1951 to 1971 has been revised and carried back to 1947 on the 1960 S.I.C.

The data contained in this publication have been revised for the years 1973 to 1976 to incorporate T4 earnings levels as reported to Revenue Canada. Earlier estimates from 1947 onward are available on request from the Labour Income Section, Statistics Canada. In addition, aggregated annual and monthly labour income data can be accessed from CANSIM.

Although the monthly estimates of wages and salaries are derived by province for 18 industry groups not all the detailed data are released because of confidentiality requirements and reliability constraints. The criteria for publication are based on the level and proportion of employment which is used to derive the wages and salaries estimates in relation to the total employment in any given industry.

Les estimations mensuelles du revenu du travail sont établies par la projection des données de référence annuelles à l'aide d'indicateurs de l'emploi et des gains courants ou des tendances si l'on ne dispose pas de données. Les coefficients de projection les plus importants sont les indices de la rémunération dans les grandes entreprises, qui servent à projeter environ 74 % de toutes les estimations mensuelles des salaires et traitements. Ces indices sont calculés à partir des gains déclarés pour une période de référence donnée dans le cadre de l'enquête mensuelle sur l'emploi et la rémunération. Le tableau III indique les coefficients de projection pour les 12 mois de 1977 ainsi que leur importance relative.

### Présentation statistique

Les estimations mensuelles des salaires et traitements sont établies par province et par branche d'activité; elles sont présentées au tableau III. Les chiffres mensuels les plus récents sont des estimations préliminaires fondées sur un nombre restreint de déclarations. Ces données ne sont pas aussi fiables que les estimations des mois précédents qui renferment des renseignements supplémentaires.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées pour les années de 1926 à 1969; vous pouvez en faire la demande auprès de la Section du revenu du travail à Statistique Canada. Les données fondées sur la Classification des industries de 1960 ont été publiées pour la première fois en 1969 et visaient la période allant de 1951 à 1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière, de 1951 à 1971, a été révisée et reportée à 1947 suivant la C.T.I. de 1960.

Les données de la présente publication ont été révisées pour les années 1973 à 1976 afin de tenir compte des niveaux des gains déclarés à Revenue Canada (T4). Vous pouvez vous procurer sur demande les estimations qui portent sur la période allant de 1947 à nos jours en vous adressant à la Section du revenu du travail à Statistique Canada. De plus, vous pouvez avoir accès aux données annuelles et mensuelles regroupées sur le revenu du travail par l'intermédiaire de CANSIM.

Bien que les estimations mensuelles des salaires et traitements soient calculées par province pour 18 branches d'activité économique, les renseignements détaillés ne sont pas tous diffusés en raison de restrictions en matière de confidentialité et de fiabilité. Les critères de publication se fondent sur le niveau et la proportion des effectifs utilisés pour établir les estimations des salaires et traitements par rapport à l'effectif total dans une branche d'activité donnée.

The industry data in this publication are aggregated to two groupings which are not found in the Standard Industrial Classification manual; these are the Goods-producing Industries (agriculture; fishing and trapping; forestry; mines, quarries and oil wells; manufacturing industries; and the construction industry) and the Service-producing Industries (transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal service industries; public administration).

Les données relatives aux branches d'activité présentées ici sont classées en deux groupes qui ne figurent pas dans la Classification type des industries: ce sont notamment les industries de biens (agriculture, pêche et piégeage, forêts, mines, carrières et puits de pétrole, industries manufacturières, bâtiment et travaux publics) et les industries de services (transports, communications et autres services publics, commerce, finances, assurances et affaires immobilières, services socio-culturels, commerciaux et personnels, administration publique).

TABLE III. Labour Income Data Sources and Weights

TABLEAU III. Poids et données de base du revenu du travail

Industry groups Branches d'activité économique	Projectors Projecteurs	Weights - 1976 total wages and salaries = 100% Poids - Rémunérations totales 1976 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals - Tendence de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing - Pêche.	Value of fish caught and landed as published in Fisheries Statistics, Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Catalogue 23-207 - Valeur des poissons pris et débarqués, selon La statistique mensuelle des pêches du Canada, n° 24-002 au catalogue et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication Production de fourrures, n° 23-207 au catalogue.	0.1
3. Hunting and trapping - Chasse et piégeage.		
4. Forestry - Forêts.		1.1
5. Mining - Mines.		2.6
6. Manufacturing - Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment, Earnings and Hours, Catalogue 72-002 - Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication Emploi, gains et heures de travail, n° 72-002 au catalogue.	22.8

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

- 72-002    **Emploi, gains et durée du travail.** Bil.
- 72-005    **Estimations du revenu du travail.** Bil.

#### Annuel

- 72-206    **Emploi, rémunérations et heures séries désaisonnalisées.** Bil.

#### Hors série

- 72-506    **Coûts de la main-d'oeuvre dans l'industrie manufacturière.** Bil.
- 72-508    **Estimations du nombre d'employés par province et industrie.** Bil.
- 72-510    **Coûts de la main-d'oeuvre dans l'industrie manufacturière.** Bil.
- 72-511    **Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole,** Bil.
- 72-513    **Estimations du nombre d'employés par province et par industrie.** Bil.
- 72-514    **Estimations du nombre d'employés par province et par industrie.** Bil.

#### Annuel/divers

- 72-601    **Gains et heures de travail au Canada: Commerce de détail, septembre 1970.** Bil.
- 72-602    **Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972.** Bil.
- 72-603    **Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973.** Bil.
- 72-610    **Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970.** Bil.
- 72-611    **Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970.** Bil.
- 72-612    **Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971.** Bil.
- 72-613    **Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972.** Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

72-002 Employment, Earnings and Hours. Bil.

72-005 Estimates of Labour Income. Bil.

### Annual

72-206 Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

### Occasional

72-506 Labour Costs in Manufacturing. Bil.

72-508 Estimates of Employees by Province and Industry. Bil.

72-510 Labour Costs in Manufacturing. Bil.

72-511 Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.

72-513 Estimates of Employees by Province and Industry. Bil.

72-514 Estimates of Employees by Province and Industry. Bil.

### Annual/Various

72-601 Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.

72-602 Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.

72-603 Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.

72-610 Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.

72-611 Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.

72-612 Labour Costs in Canada: Manufacturing, 1971. Bil.

72-613 Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivant sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## Salaires et traitements dans les industries de biens et les industries de services — Chiffres désaisonnalisés

Base: classification type des industries de 1960

# SUMMARY OF LABOUR INCOME ESTIMATES

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Not included in labour income are military pay and allowances and income received by self-employed persons, for example, independent professionals, proprietors of unincorporated businesses and farmers. A more detailed description of the estimates and their method of construction is found in the section "Concepts and Methods" on page 43.

When perusing the tables two types of variances and the reasons for their occurrences should be noted: first, some columns and rows do not sum to the totals shown because of rounding and second, residual errors resulting from separate seasonal adjustments by province and by industry may be observed in the respective Canada totals. A summary of the current labour income estimates is shown in the table immediately below.

# SOMMAIRE DES ESTIMATIONS DU REVENU DU TRAVAIL

Le revenu du travail, qui comprend les salaires, les traitements et le revenu supplémentaire du travail, désigne toute rémunération versée aux salariés résident au Canada. Ne sont pas compris dans le revenu du travail les soldes et les indemnités militaires ainsi que le revenu que touchent les travailleurs autonomes comme les professionnels indépendants, les propriétaires d'entreprises individuelles et les cultivateurs. On trouvera une description plus détaillée des estimations et de leur méthode de calcul sous la rubrique "Concepts et méthodes", à la page 43.

En examinant les tableaux, on notera deux sortes de variances. Voici les raisons de leur présence: d'abord, les sommes des éléments de quelques colonnes et lignes ne correspondent pas aux totaux indiqués à cause de l'arrondissement; ensuite, les totaux respectifs canadiens comportent des erreurs résiduelles résultant des désaisonnalisations effectuées à l'échelle provinciale et sectorielle. Le tableau ci-dessous donne un résumé des estimations courantes du revenu du travail.

Summary of Labour Income Estimates  
Basis: 1960 Standard Industrial Classification

2nd — 1977 — 2e .....	27,225	29,456	26,996	29,209	29,390
3rd — 1977 — 3e .....	27,924	30,211	27,667	29,929	30,043
<u>Change of most recent quarter from — Variation au dernier tri- mestre par rapport</u>					
Previous quarter — Au trimestre précédent .....	+ 2.6	+ 2.6	+ 2.5	+ 2.5	+ 2.2
Same quarter a year ago — Au même trimestre un an plus tôt .....	+ 10.4	+ 10.6	+ 10.7	+ 10.8	+ 10.0

(1) This column shows what labour income would have been if no employees had received retroactive payments and if no earnings had been lost as a result of strikes and lock-outs. — Dans cette colonne, on indique à combien se serait chiffré le revenu du travail si aucun employé n'avait touché de rappels et si aucune grève ou lock-out n'avait occasionné de pertes de revenu.

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. By definition this includes Canadians who are employed abroad by the federal government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers. Military pay and allowances which fit the definition of labour income are also excluded because they are shown as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retro-active wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Remuneration accumulating over time, for example, retro-active payments, are accounted for in the month and year in which they are paid.

Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance. Annual supplementary labour income benchmarks are derived by province and industry. The monthly estimates are calculated at the provincial level only; they are computed as fixed proportions of total provincial wages and salaries. The latest available annual supplementary labour income data by industry and component are shown in Tables I and II respectively.

The annual wages and salaries benchmarks are constructed from data sources providing the most complete coverage. Data sources include administrative records, censuses, sample surveys and estimates based on indirect measures in cases where there is no current information available.

Revenue Canada T4 taxation data is very similar to total wages and salaries as defined; therefore, these data have been selected to provide basic annual wages and salaries benchmarks for Canada. The 1977 annual revision of the labour income estimates incorporates a T4 level adjustment for the years 1973 to 1975 with a projection for the year 1976. The relative proportions of the individual industry benchmarks have not been revised.

Le revenu du travail, qui comprend les salaires et traitements et le revenu supplémentaire du travail, représente la rémunération totale versée aux salariés demeurant au Canada. Par définition, cela comprend les Canadiens travaillant à l'étranger pour l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les cultivateurs ne font pas partie du revenu du travail. La solde et les indemnités militaires répondent à la définition de revenu du travail, mais ils sont également exclus car ils constituent un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, le revenu en nature, les allocations imposables et les rappels de salaire. Les estimations des salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc. La rémunération accumulée avec le temps, comme les rappels de salaire, est prise en compte durant le mois et l'année au cours desquels elle est versée.

Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage. Les données de référence annuelles relatives au revenu supplémentaire du travail sont établies par province et par branche d'activité. Les estimations mensuelles sont établies à l'échelle provinciale seulement; elles sont calculées en pourcentages fixes du total des salaires et traitements pour les provinces. Les données annuelles les plus récentes sur le revenu supplémentaire du travail, par branche d'activité et par composante, figurent aux tableaux I et II respectivement.

Les données de référence annuelles relatives aux salaires et traitements sont établies à partir de sources le plus exhaustives possible. Les sources de données comprennent les dossiers administratifs, les recensements, les enquêtes par sondage et les estimations fondées sur des mesures indirectes dans les cas où l'on ne dispose pas de données courantes.

Les données fiscales de Revenu Canada provenant des déclarations d'impôts T4 donnent une idée assez juste des salaires et traitements déjà définis; nous nous sommes donc servis de ces dernières afin d'établir les données de référence de base relatives aux salaires et traitements au Canada. La révision annuelle de 1977 des estimations du revenu du travail présente un redressement au niveau T4 pour les années 1973 à 1975 ainsi qu'une projection pour 1976. Les proportions relatives des données de référence liées à chaque entreprise n'ont pas été révisées.

Données de référence annuelles pour l'année 1976, en millions de dollars

	Component — Composante	Supplementary labour income — Revenu supplémen- taire du travail
	dollars	per cent — pourcentage
Pensions — Pensions .....	3,610.5	45.46
Welfare — Bien-être .....	902.6	11.36
Unemployment Insurance — Assurance chômage .....	1,400.3	17.63
Workmen's Compensation — Indemnisation des acci- dents du travail .....	975.3	12.28
Canada and Quebec Pension Plan — Régime de pen- sions du Canada et Régime de rentes du Québec .....	1,054.0	13.27
Total .....	7,942.8	100.00

The monthly labour income estimates are projected from the established annual benchmarks by means of current employment and earnings indicators or historic trends if data are not available. The most important projectors are payroll indexes of large firms which are used to project about 74% of all monthly wages and salaries estimates. These payroll indexes are derived from earnings reported for a specified reference period in the Monthly Employment and Payroll Survey. The projectors for the 12 months of 1977 and their relative importance are shown in Table III.

### Statistical Presentation

The monthly wages and salaries estimates are prepared for each province and industry group shown in Table III. The latest monthly figures are advance estimates which are based on a limited number of reports. These data are less reliable than the estimates of preceding months which include additional information.

Estimates of labour income based on the 1948 Standard Industrial Classification have been released for the years 1926 to 1969 and are available on request from the Labour Income Section, Statistics Canada. Data based on the 1960 Standard Industrial Classification were first published in 1969 covering the period 1951 to 1968. These estimates were projected to the end of 1971. The entire series 1951 to 1971 has been revised and carried back to 1947 on the 1960 S.I.C.

The data contained in this publication have been revised for the years 1973 to 1976 to incorporate T4 earnings levels as reported to Revenue Canada. Earlier estimates from 1947 onward are available on request from the Labour Income Section, Statistics Canada. In addition, aggregated annual and monthly labour income data can be accessed from CANSIM.

Although the monthly estimates of wages and salaries are derived by province for 18 industry groups not all the detailed data are released because of confidentiality requirements and reliability constraints. The criteria for publication are based on the level and proportion of employment which is used to derive the wages and salaries estimates in relation to the total employment in any given industry.

Les estimations mensuelles du revenu du travail sont établies par la projection des données de référence annuelles à l'aide d'indicateurs de l'emploi et des gains courants ou des tendances si l'on ne dispose pas de données. Les coefficients de projection les plus importants sont les indices de la rémunération dans les grandes entreprises, qui servent à projeter environ 74 % de toutes les estimations mensuelles des salaires et traitements. Ces indices sont calculés à partir des gains déclarés pour une période de référence donnée dans le cadre de l'enquête mensuelle sur l'emploi et la rémunération. Le tableau III indique les coefficients de projection pour les 12 mois de 1977 ainsi que leur importance relative.

### Présentation statistique

Les estimations mensuelles des salaires et traitements sont établies par province et par branche d'activité; elles sont présentées au tableau III. Les chiffres mensuels les plus récents sont des estimations préliminaires fondées sur un nombre restreint de déclarations. Ces données ne sont pas aussi fiables que les estimations des mois précédents qui renferment des renseignements supplémentaires.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées pour les années de 1926 à 1969; vous pouvez en faire la demande auprès de la Section du revenu du travail à Statistique Canada. Les données fondées sur la Classification des industries de 1960 ont été publiées pour la première fois en 1969 et visaient la période allant de 1951 à 1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière, de 1951 à 1971, a été révisée et reportée à 1947 suivant la C.T.I. de 1960.

Les données de la présente publication ont été révisées pour les années 1973 à 1976 afin de tenir compte des niveaux des gains déclarés à Revenu Canada (T4). Vous pouvez vous procurer sur demande les estimations qui portent sur la période allant de 1947 à nos jours en vous adressant à la Section du revenu du travail à Statistique Canada. De plus, vous pouvez avoir accès aux données annuelles et mensuelles regroupées sur le revenu du travail par l'intermédiaire de CANSIM.

Bien que les estimations mensuelles des salaires et traitements soient calculées par province pour 18 branches d'activité économique, les renseignements détaillés ne sont pas tous diffusés en raison de restrictions en matière de confidentialité et de fiabilité. Les critères de publication se fondent sur le niveau et la proportion des effectifs utilisés pour établir les estimations des salaires et traitements par rapport à l'effectif total dans une branche d'activité donnée.

The industry data in this publication are aggregated to two groupings which are not found in the Standard Industrial Classification manual; these are the Goods-producing Industries (agriculture; fishing and trapping; forestry; mines, quarries and oil wells; manufacturing industries; and the construction industry) and the Service-producing Industries (transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal service industries; public administration).

Les données relatives aux branches d'activité présentées ici sont classées en deux groupes qui ne figurent pas dans la Classification type des industries: ce sont notamment les industries de biens (agriculture, pêche et piégeage, forêts, mines, carrières et puits de pétrole, industries manufacturières, bâtiment et travaux publics) et les industries de services (transports, communications et autres services publics, commerce, finances, assurances et affaires immobilières, services socio-culturels, commerciaux et personnels, administration publique).

TABLE III. Labour Income Data Sources and Weights

TABLEAU III. Poids et données de base du revenu du travail

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1976 total wages and salaries = 100% — Poids — Rémunérations totales 1976 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics, Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Catalogue 23-207 — Valeur des poissons pris et débarqués, selon La statistique mensuelle des pêches du Canada, n° 24-002 au catalogue et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication Production de fourrures, n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.6
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment, Earnings and Hours, Catalogue 72-002 — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication Emploi, gains et heures de travail, n° 72-002 au catalogue.	22.8
7. Construction.		8.5
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		10.5
9. Trade — Commerce.		
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		13.6
11. Commercial services — Services commerciaux.		6.2
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514, combined with average earnings in the large firms(1) for education — Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue et gains moyens dans les grandes entreprises(1) pour l'enseignement.	8.4
13. Hospitals and welfare organizations — Hôpitaux et services sociaux.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Catalogue 72-514, combined with an average earnings series derived from contract settlements as reported in Labour Canada Publication Collective Bargaining Review — Nombre de salariés calculé pour la publication Estimations du nombre de salariés par province et par industrie, n° 72-514 au catalogue et gains moyens calculés à partir des contrats de travail signalés dans la Revue de la négociation collective publiée par Travail Canada.	9.5
14. Religious organizations and private households — Organisations culturelles et ménages privés.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	6.0
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Catalogue 72-004 — Salaires et traitements fondées sur les données établies pour L'emploi dans l'administration fédérale, n° 72-004 au catalogue.	0.9
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Catalogue 72-007 — Salaires et traitements fondées sur les données établies pour L'emploi dans les administrations publiques provinciales, n° 72-007 au catalogue.	3.8
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment, Catalogue 72-009 — Salaires et traitements fondées sur les données établies pour L'emploi dans les administrations locales, n° 72-009 au catalogue.	2.9
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration — Projections sur la même base que pour l'administration fédérale.	2.2

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 **Emploi, gains et durée du travail.** Bil.

72-005 **Estimations du revenu du travail.** Bil.

#### Annuel

72-206 **Emploi, rémunérations et heures séries désaisonnalisées.** Bil.

#### Hors série

72-506 **Coûts de la main-d'oeuvre dans l'industrie manufacturière.** Bil.

72-508 **Estimations du nombre d'employés par province et industrie.** Bil.

72-510 **Coûts de la main-d'oeuvre dans l'industrie manufacturière.** Bil.

72-511 **Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole,** Bil.

72-513 **Estimations du nombre d'employés par province et par industrie.** Bil.

72-514 **Estimations du nombre d'employés par province et par industrie.** Bil.

#### Annuel/divers

72-601 **Gains et heures de travail au Canada: Commerce de détail, septembre 1970.** Bil.

72-602 **Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972.** Bil.

72-603 **Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973.** Bil.

72-610 **Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970.** Bil.

72-611 **Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970.** Bil.

72-612 **Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971.** Bil.

72-613 **Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972.** Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

72-002    **Employment, Earnings and Hours. Bil.**

72-005    **Estimates of Labour Income. Bil.**

### Annual

72-206    **Employment, Earnings and Hours Seasonally-adjusted Series. Bil.**

### Occasional

72-506    **Labour Costs in Manufacturing. Bil.**

72-508    **Estimates of Employees by Province and Industry. Bil.**

72-510    **Labour Costs in Manufacturing. Bil.**

72-511    **Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.**

72-513    **Estimates of Employees by Province and Industry. Bil.**

72-514    **Estimates of Employees by Province and Industry. Bil.**

### Annual/Various

72-601    **Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.**

72-602    **Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.**

72-603    **Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.**

72-610    **Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.**

72-611    **Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.**

72-612    **Labour Costs in Canada: Manufacturing, 1971. Bil.**

72-613    **Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.**

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivant sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## Wages, Salaries and Supplementary Labour Income

Basis: 1960 Standard Industrial Classification

## Salaires, traitements et revenu supplémentaire du travail

Base: classification type des industries de 1960

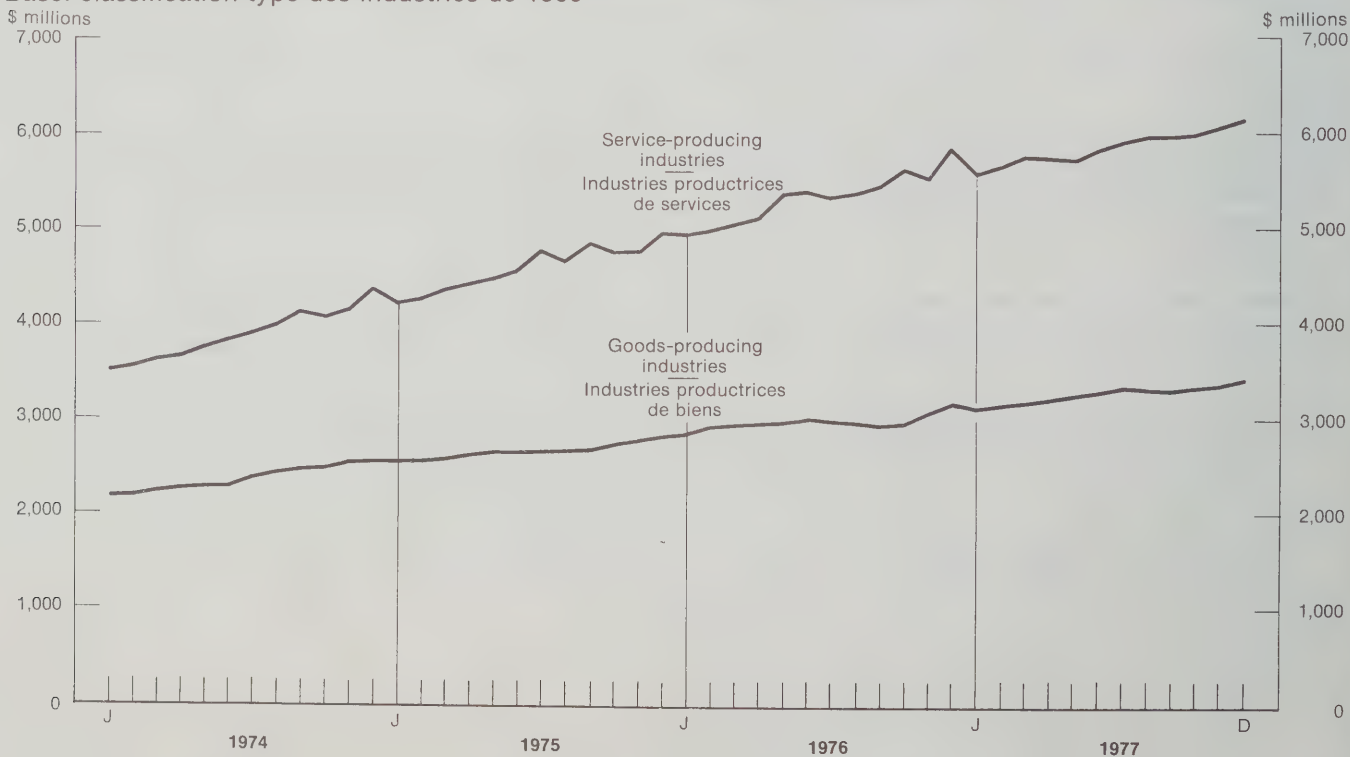

## Wages and Salaries in the Goods-producing and the Service-producing Industries — Seasonally Adjusted

Basis: 1960 Standard Industrial Classification

## Salaires et traitements dans les industries de biens et les industries de services — Chiffres désaisonnalisés

Base: classification type des industries de 1960

# SUMMARY OF LABOUR INCOME ESTIMATES

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Not included in labour income are military pay and allowances and income received by self-employed persons, for example, independent professionals, proprietors of unincorporated businesses and farmers. A more detailed description of the estimates and their method of construction is found in the section "Concepts and Methods" on page 43.

When perusing the tables two types of variances and the reasons for their occurrences should be noted: first, some columns and rows do not sum to the totals shown because of rounding and second, residual errors resulting from separate seasonal adjustments by province and by industry may be observed in the respective Canada totals. A summary of the current labour income estimates is shown in the table immediately below.

# SOMMAIRE DES ESTIMATIONS DU REVENU DU TRAVAIL

Le revenu du travail, qui comprend les salaires, les traitements et le revenu supplémentaire du travail, désigne toute rémunération versée aux salariés résident au Canada. Ne sont pas compris dans le revenu du travail les soldes et les indemnités militaires ainsi que le revenu que touchent les travailleurs autonomes comme les professionnels indépendants, les propriétaires d'entreprises individuelles et les cultivateurs. On trouvera une description plus détaillée des estimations et de leur méthode de calcul sous la rubrique "Concepts et méthodes", à la page 43.

En examinant les tableaux, on notera deux sortes de variances. Voici les raisons de leur présence: d'abord, les sommes des éléments de quelques colonnes et lignes ne correspondent pas aux totaux indiqués à cause de l'arrondissement; ensuite, les totaux respectifs canadiens comportent des erreurs résiduelles résultant des désaisonnalisations effectuées à l'échelle provinciale et sectorielle. Le tableau ci-dessous donne un résumé des estimations courantes du revenu du travail.

## Summary of Labour Income Estimates Basis: 1960 Standard Industrial Classification

## Sommaire des estimations du revenu du travail Base: Classification type des industries de 1960

	Unadjusted for seasonal variation — Chiffres non désaisonnalisés		Adjusted for seasonal variation — Chiffres désaisonnalisés		Labour income unadjusted for seasonal varia- tions prior to adjustments for strikes and retro-active payments(1) — Revenu du travail non désaisonné, avant redresse- ments pour grèves et rappels(1)

<u>Change of most recent quarter from — Variation au dernier tri- mestre par rapport</u>					
Previous quarter — Au trimestre précédent .....	+ 1.3	+ 1.3	+ 1.5	+ 1.5	+ 1.2
Same quarter a year ago — Au même trimestre un an plus tôt .....	+ 7.7	+ 7.9	+ 7.6	+ 7.6	+ 9.2

(1) This column shows what labour income would have been if no employees had received retroactive payments and if no earnings had been lost as a result of strikes and lock-outs. — Dans cette colonne, on indique à combien se serait chiffré le revenu du travail si aucun employé n'avait touché de rappels et si aucune grève ou lock-out n'avait occasionné de pertes de revenu.

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. By definition this includes Canadians who are employed abroad by the federal government. Not included in labour income are earnings received by self-employed persons such as independent professionals, proprietors of unincorporated businesses and farmers. Military pay and allowances which fit the definition of labour income are also excluded because they are shown as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions, gratuities, income in kind, taxable allowances and retro-active wage payments. Wages and salaries are estimated on a "gross" basis, that is, before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Remuneration accumulating over time, for example, retro-active payments, are accounted for in the month and year in which they are paid.

Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance. Annual supplementary labour income benchmarks are derived by province and industry. The monthly estimates are calculated at the provincial level only; they are computed as fixed proportions of total provincial wages and salaries. The latest available annual supplementary labour income data by industry and component are shown in Tables I and II respectively.

The annual wages and salaries benchmarks are constructed from data sources providing the most complete coverage. Data sources include administrative records, censuses, sample surveys and estimates based on indirect measures in cases where there is no current information available.

Revenue Canada T4 taxation data is very similar to total wages and salaries as defined; therefore, these data have been selected to provide basic annual wages and salaries benchmarks for Canada. The 1977 annual revision of the labour income estimates incorporates a T4 level adjustment for the years 1973 to 1975 with a projection for the year 1976. The relative proportions of the individual industry benchmarks have not been revised.

Le revenu du travail, qui comprend les salaires et traitements et le revenu supplémentaire du travail, représente la rémunération totale versée aux salariés demeurant au Canada. Par définition, cela comprend les Canadiens travaillant à l'étranger pour l'administration fédérale. Les gains des travailleurs indépendants comme les professionnels, les propriétaires d'entreprises individuelles et les cultivateurs ne font pas partie du revenu du travail. La solde et les indemnités militaires répondent à la définition de revenu du travail, mais ils sont également exclus car ils constituent un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les primes, les commissions, les gratifications, le revenu en nature, les allocations imposables et les rappels de salaire. Les estimations des salaires et traitements sont fondées sur des chiffres bruts, c'est-à-dire, avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, des cotisations à des caisses de retraite, etc. La rémunération accumulée avec le temps, comme les rappels de salaire, est prise en compte durant le mois et l'année au cours desquels elle est versée.

Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage. Les données de référence annuelles relatives au revenu supplémentaire du travail sont établies par province et par branche d'activité. Les estimations mensuelles sont établies à l'échelle provinciale seulement; elles sont calculées en pourcentages fixes du total des salaires et traitements pour les provinces. Les données annuelles les plus récentes sur le revenu supplémentaire du travail, par branche d'activité et par composante, figurent aux tableaux I et II respectivement.

Les données de référence annuelles relatives aux salaires et traitements sont établies à partir de sources le plus exhaustives possible. Les sources de données comprennent les dossiers administratifs, les recensements, les enquêtes par sondage et les estimations fondées sur des mesures indirectes dans les cas où l'on ne dispose pas de données courantes.

Les données fiscales de Revenu Canada provenant des déclarations d'impôts T4 donnent une idée assez juste des salaires et traitements déjà définis; nous nous sommes donc servis de ces dernières afin d'établir les données de référence de base relatives aux salaires et traitements au Canada. La révision annuelle de 1977 des estimations du revenu du travail présente un redressement au niveau T4 pour les années 1973 à 1975 ainsi qu'une projection pour 1976. Les proportions relatives des données de référence liées à chaque entreprise n'ont pas été révisées.

TABLE I. Supplementary Labour Income by Industry  
Annual Benchmarks for the year 1976, in millions of dollars

TABLEAU I. Revenu supplémentaire du travail par branche d'activité  
Données de référence annuelles pour l'année 1976, en millions de dollars

	Industry — Branche d'activité	Supplementary labour income — Revenu supplémen- taire du travail
	dollars	per cent — pourcentage
Agriculture — Agriculture .....	15.4	.19
Fishing, hunting and trapping — Pêche et piégeage .....	4.4	.06
Forestry — Forêts .....	102.0	1.28
Mining — Mines .....	298.7	3.76
Manufacturing — Industries manufacturières .....	2,058.7	25.92
Construction — Bâtiment et travaux publics .....	544.9	6.86
Transportation, etc. — Transports, etc. ....	1,296.0	16.32
Trade — Commerce .....	622.3	7.84
Finance — Finances .....	379.1	4.77
Total service — Services .....	1,626.8	20.48
Public administration — Administration publique .....	994.4	12.52
Total .....	7,942.8	100.00

TABLE II. Supplementary Labour Income by Component  
Annual Benchmarks for the Year 1976, in millions of dollars

TABLEAU II. Revenu supplémentaire du travail par composante  
Données de référence annuelles pour l'année 1976, en millions de dollars

	Component — Composante	Supplementary labour income — Revenu supplémen- taire du travail
	dollars	per cent — pourcentage
Pensions — Pensions .....	3,610.5	45.46
Welfare — Bien-être .....	902.6	11.36
Unemployment Insurance — Assurance chômage .....	1,400.3	17.63
Workmen's Compensation — Indemnisation des acci- dents du travail .....	975.3	12.28
Canada and Quebec Pension Plan — Régime de pen- sions du Canada et Régime de rentes du Québec .....	1,054.0	13.27
Total .....	7,942.8	100.00

The monthly labour income estimates are projected from the established annual benchmarks by means of current employment and earnings indicators or historic trends if data are not available. The most important projectors are payroll indexes of large firms which are used to project about 74% of all monthly wages and salaries estimates. These payroll indexes are derived from earnings reported for a specified reference period in the Monthly Employment and Payroll Survey. The projectors for the 12 months of 1977 and their relative importance are shown in Table III.

### Statistical Presentation

The monthly wages and salaries estimates are prepared for each province and industry group shown in Table III. The latest monthly figures are advance estimates which are based on a limited number of reports. These data are less reliable than the estimates of preceding months which include additional information.

Estimates of labour income based on the 1948 Standard Industrial Classification have been released for the years 1926 to 1969 and are available on request from the Labour Income Section, Statistics Canada. Data based on the 1960 Standard Industrial Classification were first published in 1969 covering the period 1951 to 1968. These estimates were projected to the end of 1971. The entire series 1951 to 1971 has been revised and carried back to 1947 on the 1960 S.I.C.

The data contained in this publication have been revised for the years 1973 to 1976 to incorporate T4 earnings levels as reported to Revenue Canada. Earlier estimates from 1947 onward are available on request from the Labour Income Section, Statistics Canada. In addition, aggregated annual and monthly labour income data can be accessed from CANSIM.

Although the monthly estimates of wages and salaries are derived by province for 18 industry groups not all the detailed data are released because of confidentiality requirements and reliability constraints. The criteria for publication are based on the level and proportion of employment which is used to derive the wages and salaries estimates in relation to the total employment in any given industry.

Les estimations mensuelles du revenu du travail sont établies par la projection des données de référence annuelles à l'aide d'indicateurs de l'emploi et des gains courants ou des tendances si l'on ne dispose pas de données. Les coefficients de projection les plus importants sont les indices de la rémunération dans les grandes entreprises, qui servent à projeter environ 74 % de toutes les estimations mensuelles des salaires et traitements. Ces indices sont calculés à partir des gains déclarés pour une période de référence donnée dans le cadre de l'enquête mensuelle sur l'emploi et la rémunération. Le tableau III indique les coefficients de projection pour les 12 mois de 1977 ainsi que leur importance relative.

### Présentation statistique

Les estimations mensuelles des salaires et traitements sont établies par province et par branche d'activité; elles sont présentées au tableau III. Les chiffres mensuels les plus récents sont des estimations préliminaires fondées sur un nombre restreint de déclarations. Ces données ne sont pas aussi fiables que les estimations des mois précédents qui renferment des renseignements supplémentaires.

Les estimations du revenu du travail fondées sur la Standard Industrial Classification de 1948 ont été publiées pour les années de 1926 à 1969; vous pouvez en faire la demande auprès de la Section du revenu du travail à Statistique Canada. Les données fondées sur la Classification des industries de 1960 ont été publiées pour la première fois en 1969 et visaient la période allant de 1951 à 1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière, de 1951 à 1971, a été révisée et reportée à 1947 suivant la C.T.I. de 1960.

Les données de la présente publication ont été révisées pour les années 1973 à 1976 afin de tenir compte des niveaux des gains déclarés à Revenu Canada (T4). Vous pouvez vous procurer sur demande les estimations qui portent sur la période allant de 1947 à nos jours en vous adressant à la Section du revenu du travail à Statistique Canada. De plus, vous pouvez avoir accès aux données annuelles et mensuelles regroupées sur le revenu du travail par l'intermédiaire de CANSIM.

Bien que les estimations mensuelles des salaires et traitements soient calculées par province pour 18 branches d'activité économique, les renseignements détaillés ne sont pas tous diffusés en raison de restrictions en matière de confidentialité et de fiabilité. Les critères de publication se fondent sur le niveau et la proportion des effectifs utilisés pour établir les estimations des salaires et traitements par rapport à l'effectif total dans une branche d'activité donnée.

The industry data in this publication are aggregated to two groupings which are not found in the Standard Industrial Classification manual; these are the Goods-producing Industries (agriculture; fishing and trapping; forestry; mines, quarries and oil wells; manufacturing industries; and the construction industry) and the Service-producing Industries (transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal service industries; public administration).

Les données relatives aux branches d'activité présentées ici sont classées en deux groupes qui ne figurent pas dans la Classification type des industries: ce sont notamment les industries de biens (agriculture, pêche et piégeage, forêts, mines, carrières et puits de pétrole, industries manufacturières, bâtiment et travaux publics) et les industries de services (transports, communications et autres services publics, commerce, finances, assurances et affaires immobilières, services socio-culturels, commerciaux et personnels, administration publique).

TABLE III. Labour Income Data Sources and Weights

TABEAU III. Poids et données de base du revenu du travail

Industry groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1976 total wages and salaries = 100% — Poids — Rémunérations totales 1976 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in <u>Fisheries Statistics</u> , Catalogue 24-002 and value of wild life for production tabulated in connection with the preparation of <u>Fur Production</u> , Catalogue 23-207 — Valeur des poissons pris et débarqués, selon <u>La statistique mensuelle des pêches du Canada</u> , n° 24-002 au catalogue et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication <u>Production de fourrures</u> , n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.6
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of <u>Employment, Earnings and Hours</u> , Catalogue 72-002 — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication <u>Emploi, gains et heures de travail</u> , n° 72-002 au catalogue.	22.8
7. Construction.		8.5
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		10.5
9. Trade — Commerce.		
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		13.6
11. Commercial services — Services commerciaux.		6.2
12. Education — Enseignement.	Number of employees as tabulated for the preparation of <u>Estimates of Employees by Province and Industry</u> , Catalogue 72-514, combined with average earnings in the large firms(1) for education — Nombre de salariés calculé pour la publication <u>Estimations du nombre de salariés par province et par industrie</u> , n° 72-514 au catalogue et gains moyens dans les grandes entreprises(1) pour l'enseignement.	8.4
13. Hospitals and welfare organizations — Hôpitaux et services sociaux.		9.5
14. Religious organizations and private households — Organisations culturelles et ménages privés.	Number of employees as tabulated for the preparation of <u>Estimates of Employees by Province and Industry</u> , Catalogue 72-514, combined with an average earnings series derived from contract settlements as reported in <u>Labour Canada Publication Collective Bargaining Review</u> — Nombre de salariés calculé pour la publication <u>Estimations du nombre de salariés par province et par industrie</u> , n° 72-514 au catalogue et gains moyens calculés à partir des contrats de travail signalés dans la <u>Revue de la négociation collective</u> publiée par Travail Canada.	6.0
15. Federal administration — Administration fédérale.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.9
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Federal Government Employment</u> , Catalogue 72-004 — Salaires et traitements fondées sur les données établies pour <u>L'emploi dans l'administration fédérale</u> , n° 72-004 au catalogue.	3.8
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Provincial Government Employment</u> , Catalogue 72-007 — Salaires et traitements fondées sur les données établies pour <u>L'emploi dans les administrations publiques provinciales</u> , n° 72-007 au catalogue.	2.9
18. Other government offices — Autres services gouvernementaux.	Wages and salaries obtained from data tabulated in connection with the preparation of <u>Local Government Employment</u> , Catalogue 72-009 — Salaires et traitements fondées sur les données établies pour <u>L'emploi dans les administrations locales</u> , n° 72-009 au catalogue.	2.2
	Projected on the same basis as federal administration — Projections sur la même base que pour l'administration fédérale.	..

## PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

72-005 Estimations du revenu du travail. Bil.

#### Annuel

72-206 Emploi, rémunérations et heures séries désaisonnalisées. Bil.

#### Hors série

72-506 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-508 Estimations du nombre d'employés par province et industrie. Bil.

72-510 Coûts de la main-d'oeuvre dans l'industrie manufacturière. Bil.

72-511 Coûts de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, Bil.

72-513 Estimations du nombre d'employés par province et par industrie. Bil.

72-514 Estimations du nombre d'employés par province et par industrie. Bil.

#### Annuel/divers

72-601 Gains et heures de travail au Canada: Commerce de détail, septembre 1970. Bil.

72-602 Gains et heures de travail au Canada: Hébergement, restauration et loisirs, 1972. Bil.

72-603 Gains et heures de travail au Canada: Finances, assurances et affaires immobilières, 1973. Bil.

72-610 Coûts de la main-d'oeuvre au Canada: Finances, assurances et immeubles, 1970. Bil.

72-611 Coûts de la main-d'oeuvre au Canada: Transports, communications et autres services d'utilité publique, 1970. Bil.

72-612 Coûts de la main-d'oeuvre au Canada: Industrie manufacturière, 1971. Bil.

72-613 Coût de la main-d'oeuvre au Canada: Mines, carrières et puits de pétrole, 1972. Bil.

*Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et sociale du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.*

## EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

### Monthly

- 72-002    Employment, Earnings and Hours. Bil.
- 72-005    Estimates of Labour Income. Bil.

### Annual

- 72-206    Employment, Earnings and Hours Seasonally-adjusted Series. Bil.

### Occasional

- 72-506    Labour Costs in Manufacturing. Bil.
- 72-508    Estimates of Employees by Province and Industry. Bil.
- 72-510    Labour Costs in Manufacturing. Bil.
- 72-511    Labour Costs in Canada: Mines, Quarries and Oil Wells. Bil.
- 72-513    Estimates of Employees by Province and Industry. Bil.
- 72-514    Estimates of Employees by Province and Industry. Bil.

### Annual/Various

- 72-601    Earnings and Hours of Work in Canada: Retail Trade Industry, September 1970. Bil.
- 72-602    Earnings and Hours of Work in Canada: Accommodation, Food and Recreational Services, 1972. Bil.
- 72-603    Earnings and Hours of Work in Canada: Finance, Insurance and Real Estate, 1973. Bil.
- 72-610    Labour Costs in Canada: Finance, Insurance and Real Estate, 1970. Bil.
- 72-611    Labour Costs in Canada: Transportation, Communication and Other Utilities, 1970. Bil.
- 72-612    Labour Costs in Canada: Manufacturing, 1971. Bil.
- 72-613    Labour Costs in Canada: Mines, Quarries and Oil Wells, 1972. Bil.

*In addition to the selected publications listed above, Statistics Canada published a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.*
